Gap Training:

Where gap training is indicated in a transition plan, training providers are asked to provide gap training to apprentices transitioning from the current program into the harmonized program. Training providers can determine the delivery mode and scheduling, providing the gap training is completed by the end of the harmonized level.

Who requires gap training?

- Apprentices who took the previous level in the current program need to take gap training with the harmonized level.
- Apprentices who took the previous level in the harmonized program do **not** need to take gap training.

Background:

On June 26, 2020, ITA Program Standards issued [OPSN 2020 005](#), which announced the implementation of Harmonized Auto Body and Collision Technician, effective April 1, 2021. In November 2020, the original [Transition Plan](#), which outlined the implementation schedule and pathways for apprentices in the Current program, was published.
