## **INTRODUCTION**

### **Marine Service Technician**

## Foreword

“Marine Service Technician” means a person who performs general servicing and repair operations on recreational vessels and light commercial vessels up to 150 feet in length.

The Marine Service Technician trade (formerly Marine Repair Technician) was developed by industry stakeholders to meet the needs of boatyard facilities servicing the recreational marine sector in British Columbia. The industry is characterized by a great variety of businesses; some offering ‘full service’ facilities encompassing a multitude of activities, and others specializing in only one aspect of the industry.

As such, the trade covers a wide variety of activities and competencies under one trade designation, and no one MST trades worker would be expected to demonstrate all the competencies covered in this Program Outline. Apprentices in the trade must *learn* about the various boatyard activities so that they understand the ‘whole boat’ and the nature of the boatyard workplace. Certain Core Competencies, expected of all apprentices, are achieved through institutional training or exposure on the job. High level trade skills are selected from a list of Advanced Competencies and are gained through on the job experiences.

This Program Outline was developed by a diverse group of industry business owners, facility managers and workers representing a cross section of the industry in British Columbia.

### **SAFETY ADVISORY**

Be advised that references to the WorkSafeBC safety regulations contained within these materials do not/may not reflect the most recent Occupational Health and Safety Regulation (the current Standards and Regulation in BC can be obtained on the following website: <http://www.worksafebc.com>. Please note that it is always the responsibility of any person using these materials to inform him/herself about the Occupational Health and Safety Regulation pertaining to his/her work.

## Acknowledgements

The Program Outline was prepared with the advice and direction of industry steering committee convened by the Transportation Industry Career Development Association. Members include:

- Jeff Adams                      Technician                      Philbrook's Boatyard Ltd.
- Campbell Black                President                        Blackline Marine Inc.
- Peter Dahl                        Administrator                 West Coast Boatyard Association
  
- Ben Gartside                    CEO                                Gartside Marine Engines Ltd.
- Drew Irwin                        CEO                                Philbrook's Boatyard Ltd.
- Chuck MacKenzie              CEO (Retired)                Cherokee Mechanical Ltd.
- Greg Shorland                 Manager                         Transportation Career Development Association  
of BC
- Glenn Spartz                    Regional Account Mgr.      Volvo Penta Canada Inc.
- Steve Tyliakos                 CEO                                Oceanos Marine Solutions Ltd.
- Anthony Utle                    CEO                                Raven Marine Services Ltd.

Industry subject matter experts retained as outline reviewers:

- Campbell Black                President                        Blackline Marine Inc.
- Nuno Covas                    Technician                        Blackline Marine Inc.
- Ben Gartside                    CEO                                Gartside Marine Engines Ltd.
- Drew Irwin                        CEO                                Philbrook's Boatyard Ltd.
- Brent Jacobi                    Manager                         Blackline Marine Inc.
- Reed Radziszewski             Technician                        Self-employed
- Dave Richardson                Technician                        Self-employed
- Keith Swinney                 Manager                         Blackline Marine Inc.
- Jeff      Wilson                    Technician                        Self-employed

The Industry Training Authority would like to acknowledge the dedication and hard work of all the industry representatives appointed to identify the training requirements of the Marine Service Technician occupation.

## How to Use this Document

Section	Training Providers	Employers/ Sponsors	Apprentices	Challengers
<b>Program Credentialing Model</b>	Communicate program length and structure, and all pathways to completion	Understand the length and structure of the program	Understand the length and structure of the program, and pathway to completion	Understand challenger pathway to Certificate of Qualification
<b>Program Assessment</b>	Communicate program completion requirements and assessment methods	Understand the various assessment requirements for the program	Understand the various assessment requirements for the program	Understand the assessment requirements they would have to fulfill in order to challenge the program
<b>OAC</b>	Communicate the competencies that industry has defined as representing the scope of the occupation	Understand the competencies that an apprentice is expected to demonstrate in order to achieve certification	View the competencies they will achieve as a result of program completion	Understand the competencies they must demonstrate in order to challenge the program
<b>Training Topics and Suggested Time Allocation</b>	Shows proportionate representation of general areas of competency (GACs) at each program level, the suggested proportion of time spent on each GAC, and percentage of time spent on theory versus practical application	Understand the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application	Understand the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application	Understand the relative weightings of various competencies of the occupation on which assessment is based
<b>Program Content</b>	Defines the objectives, learning tasks, high level content that must be covered for each competency, as well as defining observable, measurable achievement criteria for objectives with a practical component	Identifies detailed program content and performance expectations for competencies with a practical component; may be used as a checklist prior to signing a recommendation for certification (RFC) for an apprentice	Provides detailed information on program content and performance expectations for demonstrating competency	Allows individual to check program content areas against their own knowledge and performance expectations against their own skill levels

Section	Training Providers	Employers/ Sponsors	Apprentices	Challengers
<b>Training Provider Standards</b>	Defines the facility requirements, tools and equipment, reference materials (if any) and instructor requirements for the program	Identifies the tools and equipment an apprentice is expected to have access to; which are supplied by the training provider and which the student is expected to own	Provides information on the training facility, tools and equipment provided by the school and the student, reference materials they may be expected to acquire, and minimum qualification levels of program instructors	Identifies the tools and equipment a tradesperson is expected to be competent in using or operating; which may be used or provided in a practical assessment

# **Section 2**

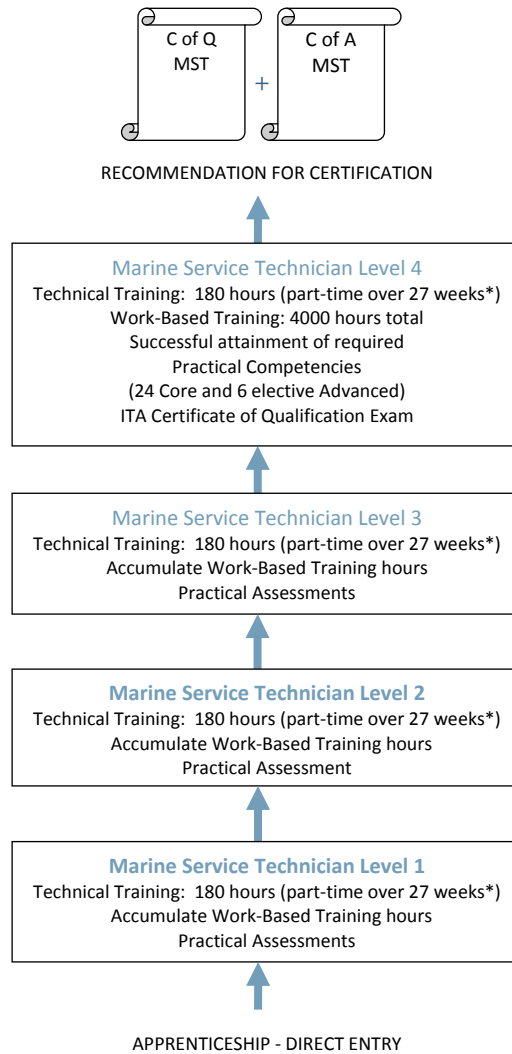

# **MARINE SERVICE TECHNICIAN**

# **PROGRAM OVERVIEW**

## Program Overview

# Program Credentialing Model

*\*Suggested duration based on 5.5 hour week – evening classes + workshops; approximately 108 weeks in total*

*Certificate of Qualification (C of Q)  
 Certificate of Apprenticeship (C of A)  
 Certificate of Completion (C of C)  
 Work-Based Training (WBT)*

### CROSS-PROGRAM CREDITS

Individuals who hold the credentials below are entitled to receive partial credit toward the completion requirements of this program

- Not applicable

## Program Assessment

Apprentices will be assessed fairly and accurately throughout the program on the various skills required to be a professional Marine Service Technician. Assessment activities are designed to provide feedback and allow for further development of skills that have been identified as essential for on the job performance.

Forms of assessment may include:

- In-class individual or group activities
- Assignments to be completed at home or in the workplace
- Development of personal portfolios of evidence documenting performance in the trade
- Theoretical evaluation (such as written tests and quizzes)
- Practical evaluation (real or simulated activities demonstrating the practical performance required in the trade)
- Oral questioning to verify underpinning knowledge and documented evidence of competency

The emphasis in this trade is on workplace skill development: demonstrated knowledge, skill and attributes that make the technician an effective contributor to the success of the employer's enterprise.

Completion Requirement	Evidence of Achievement	Level of Achievement Required
Level 1 Technical Training	Successful completion of on-line moderated studies; written and practical assessments	Minimum 70% on written assessments; declared competent for practical assessments
Level 2 Technical Training	Successful completion of on-line moderated studies; written and practical assessments	Minimum 70% on written assessments; declared competent for practical assessments
Level 3 Technical Training	Successful completion of on-line moderated studies; written and practical assessments	Minimum 70% on written assessments; declared competent for practical assessments
Level 4 Technical Training	Successful completion of on-line moderated studies; written and practical assessments	Minimum 70% on written assessments; declared competent for practical assessments
Work-Based Training Hours	Work-Based training report	As required to attain competencies
Successful attainment of 24 required core competencies plus 6 elective advanced competencies	Submission of logbook signed by the Sponsor	Declared competent
Certificate of Qualification Exam	ITA-administered exam	Minimum 70%
Recommendation for Certification	Approval or sign-off by Sponsor or other individual with sign-off authority	Declared competent

# Occupational Analysis Chart

## MARINE SERVICE TECHNICIAN

**OCCUPATION DESCRIPTION:**

THE MARINE SERVICE TECHNICIAN PROVIDES GENERAL REPAIR AND MAINTENANCE SERVICES ON PLEASURE CRAFT AND LIGHT COMMERCIAL VESSELS UP TO 150 FEET IN LENGTH. MARINE SERVICE TECHNICIANS HAVE AN UNDERSTANDING OF COMPOSITE MATERIALS, WOODWORKING AND SYSTEMS INSTALLATIONS, AND HAVE PRACTICAL COMPETENCY IN A RANGE OF SPECIFIC BOATYARD SKILLS. THEY ARE USUALLY EMPLOYED BY MARINAS, BOAT REPAIR YARDS, YACHT MANUFACTURING FACILITIES AND SPECIALTY MARINE SERVICE-PROVIDING BUSINESSES.

# **Section 3**

## **MARINE SERVICE TECHNICIAN**

### **PROGRAM OUTLINE**

# Marine Service Technician Level 1

**LINE (GAC):**      **A   SAFETY**  
**Competency:**    **A1      Prevent Workplace Injuries**

**Objectives**

To be competent in this area, the individual must be able to:

- Practice the safe use of tools and equipment.
- Describe safety procedures to prevent workplace injuries and fire.

**LEARNING TASKS**

**CONTENT**

Demonstrate the proper ways to use boatyard tools and equipment to minimize the possibility of personal injury.

- Tool handling
- Guards
- Lock outs
- Compressed air
- Lifting equipment
- Noise

Describe procedures to prevent falls and strain injuries.

- Ladder & scaffold use
- Safety harness, ascending masts
- Fall prevention, "traps"
- Lifting, confined spaces, fatigue

Describe procedures to prevent electrical shock injuries.

- Electric current theory
- Extension cords, grounding, insulation
- Water hazard
- Overhead cables
- Tagging & removing unsafe equipment from service

Describe procedures for working safely around water.

- Hypothermia, drowning
- Pfd use
- Self-rescue

Describe procedures for working safely in confined spaces and with batteries.

- Confined spaces hazards, flammables, dusts, hot surfaces
- Moving machinery
- Battery acid & hydrogen gas
- Short circuit burns, explosions

Prevent fire hazards.

- Fuels, flashpoints, combustibility
- Vapour & dust explosion
- Sources of ignition
- Spontaneous combustion
- Materials handling & storage

**Achievement Criteria**

Performance The learner will work safely on the job.

Conditions The learner will require:

- A work place or training environment

Criteria The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

**LINE (GAC):        A    SAFETY**  
**Competency:        A2        Handle Hazardous Materials Safely**

**Objectives:**

To be competent in this area, the individual must be able to:

- Recognize and identify hazardous materials commonly found in the boatyard.
- Handle them safely.

**LEARNING TASKS**

**CONTENT**

<ol style="list-style-type: none"> <li>1. Describe the dangers associated with common hazardous materials.</li> <li>2. Demonstrate appropriate safe handling and storage of hazardous materials.</li> <li>3. Describe precautions for working with hazardous materials in confined spaces.</li> <li>4. Describe WHMIS system.</li> </ol>	<ul style="list-style-type: none"> <li>• Effects of toxins &amp; dusts</li> <li>• Inhalation</li> <li>• Skin absorption</li> <li>• Ingestion</li> <li>• Risk identification</li> <li>• Safe handling</li> <li>• Storage &amp; disposal</li> <li>• Ventilation &amp; respiration</li> <li>• Fire prevention</li> <li>• Escape routes</li> <li>• MSDS &amp; manufacturer’s specifications</li> </ul>
--	--

**Achievement Criteria:**

**Performance**    The learner will handle hazardous materials safely and utilize WHMIS standards.

**Conditions**     The learner will be given:

- Access to WHMIS related documentation
- Access to hazardous materials and packaging found in the typical marine workplace.
- A work place or training environment

**Criteria**         The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to work place requirements

**LINE (GAC): A SAFETY**

**Competency: A3 Use & Maintain Personal Protection Equipment**

**Objectives:**

To be competent in this area, the individual must be able to describe and demonstrate the use of personal protection equipment.

**LEARNING TASKS**

**CONTENT**

- |  |  |
|--|--|
| <ol style="list-style-type: none"> <li>1. Describe the use of safety equipment to limit exposure to fumes &amp; dusts.</li> <li>2. Describe the use of eye and hearing protection.</li> <li>3. Describe the use of safety equipment to prevent contact with hazardous liquids.</li> <li>4. Describe the use of safety equipment to prevent physical injury.</li> <li>5. Demonstrate the use of safety equipment in the workplace.</li> </ol> | <ul style="list-style-type: none"> <li>• Respirator &amp; dust mask use</li> <li>• Respirator fit &amp; maintenance</li> <li>• Respirator fit test</li> <li>• Safety glasses, goggles &amp; face shields</li> <li>• Welding arc damage</li> <li>• Hearing protection &amp; tests</li> <li>• Gloves</li> <li>• Barrier creams</li> <li>• Coveralls, clothing, hats, etc.</li> <li>• Footwear</li> <li>• Harnesses</li> <li>• Hard hats</li> <li>• Gloves</li> <li>• Breathing protection</li> <li>• Eye and hearing protection</li> <li>• Skin protection</li> <li>• Protection from physical injury</li> </ul> |
|--|--|

**Achievement Criteria:**

- |             |   |
|-------------|---|
| Performance | The learner will describe the proper use of personal protection equipment and demonstrate use of safety equipment on the job.   |
| Conditions  | <p>The learner will require:</p> <ul style="list-style-type: none"> <li>• Safety equipment required and commonly used in the marine workplace (or may be required to provide, depending on workplace policy)</li> <li>• A work place or training environment</li> </ul>   |
| Criteria    | <p>The learner will be competent once the performance criteria is met:</p> <ul style="list-style-type: none"> <li>• Followed safe work practices throughout the entire task</li> <li>• Conducted in a logical manner</li> <li>• Conducted according to manufacturer's specifications</li> <li>• Conducted according to work place requirements</li> </ul> |

**LINE (GAC):       A    SAFETY**  
**Competency:       A4       Respond to Workplace Emergencies**

**Objectives:**

To be competent in this area, the individual must be able to describe and demonstrate appropriate procedures for response to fire or accidents in the workplace.

**LEARNING TASKS**

**CONTENT**

- |   |   |
|---|---|
| <ol style="list-style-type: none"> <li>1. Describe first response and second response procedures for fire emergencies.</li> <li>2. Describe fire extinguisher types, servicing and their use.</li> <li>3. Describe procedures in case of serious workplace injury.</li> <li>4. Demonstrate fire extinguisher use.</li> <li>5. Obtain certification in OFA Level 1.</li> </ol> | <ul style="list-style-type: none"> <li>• First response to fire emergency</li> <li>• Second response to fire emergency</li> <br/> <li>• Extinguisher types &amp; capacities</li> <li>• Extinguisher servicing</li> <li>• Extinguisher handling</li> <li>• Use of water on fires</li> <li>• Smothering fires</li> <br/> <li>• Injury &amp; bleeding</li> <li>• Electrical shock</li> <li>• Hypothermia &amp; drowning</li> <br/> <li>• Supervised firefighting demonstration</li> <br/> <li>• Recognized OFA Level 1 training program</li> </ul> |
|---|---|

**Achievement Criteria:**

**Performance**   The learner will describe in proper sequence, the procedures to follow in a boatyard workplace situation if serious fire and/or injury occurs and demonstrate the use of fire extinguishers.

- Conditions**
- The learner will require:
  - A work place or training environment
  - Charged fire extinguisher and supervised conditions for extinguishing fire.

- Criteria**
- The learner will be competent once the performance criteria is met:
- Followed safe work practices throughout the entire task
  - Conducted in a logical manner
  - Conducted according to manufacturer's specifications
  - Conducted according to work place requirements

**LINE (GAC):**      **A    SAFETY**  
**Competency:**    **A5      Describe the Role of WorkSafe BC**

**Objectives:**

To be competent in this area, the individual must be able to:

- Describe the role of the Workers' Compensation Board (WorkSafe BC).
- Describe its relationship to the company and individual workers.

**LEARNING TASKS**

**CONTENT**

- |   |   |
|---|---|
| <p>1. Describe the purpose and role of the WorkSafe BC.</p>   | <ul style="list-style-type: none"> <li>• Rights &amp; responsibilities of employers &amp; employees for safe working conditions</li> <li>• Purpose &amp; role of WorkSafe BC</li> <li>• Legal requirements</li> <li>• Scope &amp; coverage</li> <li>• Registration</li> </ul> |
| <p>2. Describe how WorkSafe BC is funded and the relationship between accidents and rates charged to employers.</p> | <ul style="list-style-type: none"> <li>• Cost structure and employer rates</li> <li>• Relationship of rates to accident claims</li> </ul>   |
| <p>3. Describe proper reporting procedures.</p>   | <ul style="list-style-type: none"> <li>• Informing employer of workplace injury</li> <li>• Informing WorkSafe BC of injury</li> </ul>   |
| <p>4. Describe the importance and implications of WorkSafe BC workplace inspections.</p>                            | <ul style="list-style-type: none"> <li>• Written forms &amp; reports</li> <li>• WorkSafe BC workplace inspections</li> </ul>  |

**LINE (GAC):**        **B**    **YARD MANAGEMENT**  
**Competency:**     **B2**        **Maintain Professional Approach**

**Objectives:**

To be competent in this area, the individual must be able to:

- Describe a professional approach to work.
- Demonstrate fundamentals of a professional approach to work.

**LEARNING TASKS**

**CONTENT**

<p>1. Describe the personal attributes associated with professionalism.</p>	<ul style="list-style-type: none"> <li>• Responsibility</li> <li>• Reliability</li> <li>• Conflict resolution</li> <li>• Appearance</li> <li>• Self awareness</li> <li>• Open and honest communications</li> </ul>
<p>2. Describe the importance of clear and timely communications.</p>	<ul style="list-style-type: none"> <li>• Communications between employees and customers</li> <li>• Difficult people or situations</li> <li>• Privileged information, feedback, courtesy and timeliness</li> <li>• Record keeping and office paperwork</li> </ul>
<p>3. Describe the benefits of maintaining a clean and neat work environment.</p>	<ul style="list-style-type: none"> <li>• Safety</li> <li>• Efficiency</li> <li>• Morale</li> <li>• Professional presentation</li> </ul>
<p>4. Describe opportunities for advancement in the profession and the experience or training required.</p>	<ul style="list-style-type: none"> <li>• Skill development &amp; training</li> <li>• Career paths</li> </ul>
<p>5. Describe the fundamentals of professionalism in the workplace.</p>	<ul style="list-style-type: none"> <li>• Personal attributes</li> <li>• Communications and customer relations</li> <li>• Clean and tidy work environment</li> <li>• Training and learning opportunities</li> </ul>

**LINE (GAC):        B    YARD MANAGEMENT**  
**Competency:        B5        Use Communication Tools**

**Objectives:**

To be competent in this area, the individual must be able to:

- Use workplace documents and forms to communicate workplace information.
- Use electronic media to communicate and to access workplace information.

**LEARNING TASKS**

**CONTENT**

- |   |  |
|---|--|
| <p>1. Use workplace documents and forms.</p><br><br><br><br><br><p>2. Use electronic media.</p> | <ul style="list-style-type: none"> <li>• Technical manuals</li> <li>• Policy manuals</li> <li>• Catalogues and directories</li> <li>• Workplace forms           <ul style="list-style-type: none"> <li>○ Time and materials sheets</li> <li>○ Work orders</li> <li>○ QA forms</li> <li>○ Estimates</li> <li>○ Requisitions</li> </ul> </li> <br/> <li>• Fax equipment</li> <li>• Computer email</li> <li>• Web based information           <ul style="list-style-type: none"> <li>○ OEM data and manuals</li> <li>○ Search engines</li> </ul> </li> <li>• Computer security and privacy</li> </ul> |
|---|--|

**Achievement Criteria:**

**Performance**    The learner will use written documents or forms and electronic equipment to communicate and to access information relevant to the workplace.

- Conditions**    The learner will require:
- A work place or training environment.
  - Access to computers and fax equipment

- Criteria**        The learner will be competent once the performance criteria is met:
- Followed safe work practices throughout the entire task
  - Conducted in a logical manner
  - Conducted according to manufacturer’s specifications
  - Conducted according to work place requirements

**LINE (GAC): C YARD PRACTICES**

**Competency: C2 Secure & Block Vessels**

**Objectives:**

To be competent in this area, the individual must be able to:

- Secure vessels at docks.
- Describe the procedures for hauling and blocking vessels in the yard.

**LEARNING TASKS**

**CONTENT**

<p>1. Demonstrate ability to secure vessels properly at docks.</p> <p>2. Describe common haul-out equipment and its use.</p> <p>3. Describe blocking placement for various vessel types and repair situations.</p> <p>4. Obtain Forklift Operator certification.</p>	<ul style="list-style-type: none"> <li>• Types of lines</li> <li>• Uses of lines</li> <li>• Common knots &amp; hitches</li> <li>• Securing vessels</li>   <li>• Travel lifts</li> <li>• Marine ways</li> <li>• Vertical lifts</li> <li>• Trailers &amp; ramps</li>   <li>• Displacement power vessels</li> <li>• Planing hulls</li> <li>• Sailing vessels</li> <li>• Beam blocking sailing vessels</li> <li>• Risk of damage or distortion to older wood vessels</li>   <li>• Forklift operation (provincial certification)</li> </ul>
--	--

**Achievement Criteria:**

**Performance** The learner will describe the correct placement of blocking and jack stands for fin keel sailing vessels and planning-hull power vessels over 40', secure vessels at docks and operate forklift equipment.

**Conditions** The learner will require:

- Access to vessels over 40' to demonstrate securing operations.
- Access to Forklift Operator training and certification.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

**LINE (GAC):** D **TECHNOLOGY & DESIGN**  
**Competency:** D1 **Define Trade Terminology & Concepts**

**Objectives:**

To be competent in this area, the individual must be able to define the common terms and concepts used in the trade to describe vessels, their parts, design and performance.

**LEARNING TASKS**

**CONTENT**

- |   |   |
|---|---|
| <ol style="list-style-type: none"> <li>1. Define the terms used in hull definition.</li> <li>2. Describe the concept and the terms used in describing vessel tonnage.</li> <li>3. Define the terms used in describing vessel performance.</li> <li>4. Define the terms used in the description and design of power vessels.</li> <li>5. Define the terms used in the description and design of sailing vessels.</li> <li>6. Demonstrate an understanding of the concepts of aerodynamics and sailing rig design.</li> </ol> | <ul style="list-style-type: none"> <li>• Hull definition</li> <li>• Hull shapes &amp; characteristics</li> <li>• Lines plan terminology</li> <li>• Tonnage measure</li> <li>• Gross &amp; net tonnage</li> <li>• Boat speed</li> <li>• Speed/length ratio</li> <li>• Hull speed</li> <li>• Boat motion</li> <li>• Roll, pitch &amp; yaw</li> <li>• Powerboat types</li> <li>• Displacement hulls</li> <li>• Planing hulls</li> <li>• Propellers, nozzles &amp; thrusters</li> <li>• Rudders</li> <li>• Anti-roll devices</li> <li>• Rigging terms</li> <li>• Rig types</li> <li>• Sail terminology</li> <li>• Sailboat balance</li> <li>• Keel types</li> <li>• Rudder types</li> </ul> |
|---|---|

**LINE (GAC):** D **TECHNOLOGY & DESIGN**  
**Competency:** D3 **Interpret Technical Drawings**

**Objectives:**

To be competent in this area, the individual must be able to:

- Read and interpret technical drawings and lines plans.
- Draw simple 3-dimensional objects.

**LEARNING TASKS**

**CONTENT**

- |  |  |
|--|--|
| <ol style="list-style-type: none"> <li>1. Interpret technical drawings.</li> <br/> <li>2. Describe the concepts and terminology associated with lines plans.</li> <br/> <li>3. Create technical drawings.</li> </ol> | <ul style="list-style-type: none"> <li>• Use of scale drawings</li> <li>• Scale rules, imperial &amp; metric</li> <li>• Views</li> <li>• 3-dimensional presentations</li> <li>• Exploded diagrams</li> <br/> <li>• Lines plan terminology</li> <li>• Concept of fairness</li> <li>• Uses of the lines plan</li> <br/> <li>• Drawing tools</li> <li>• Drawing views of 3-dimensional objects</li> <li>• Labelling and dimensioning</li> </ul> |
|--|--|

**LINE (GAC):** E **TRADE MATHEMATICS**  
**Competency:** E1 **Perform Basic Math Calculations**

**Objectives:**

To be competent in this area, the individual must be able to perform mathematical calculations used in the trade.

**LEARNING TASKS**

1. Perform basic mathematical operations manually and with an electronic calculator.

**CONTENT**

- Basic operations (addition, subtraction, multiplication & division)
- Units and conversions
- Fractions
- Equations
- Powers
- Percentages
- Ratios
- Proportions

**LINE (GAC):** E **TRADE MATHEMATICS**  
**Competency:** E2 **Perform Density, Area & Volume Calculations**

**Objectives:**

To be competent in this area, the individual must be able to perform basic calculations involving density, specific gravity, area, and volume.

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. Perform basic calculations.</li> <br/> <li>2. Calculate areas.</li> <br/> <li>3. |--|---|

**LINE (GAC):** E **TRADE MATHEMATICS**  
**Competency:** E3 **Perform Measurement Operations**

**Objectives:**

To be competent in this area, the individual must be able to:

- Describe the use of common measurement tools used in the marine industry.
- Use the common measurement tools to quantify objects, liquids, pressures and temperatures.

**LEARNING TASKS**

**CONTENT**

- |   |   |
|---|---|
| <p>1. Describe the function and use of trade measurement tools.</p> | <ul style="list-style-type: none"> <li>• Measurement terminology</li> <li>• Imperial and metric systems</li> <li>• Scales</li> <li>• Micrometers</li> <li>• Callipers</li> <li>• Laser measurement tools</li> <li>• Liquid volume measurement tools</li> <li>• Temperature measurement tools</li> <li>• Pressure measurement tools</li> </ul> |
| <p>2. Use measurement tools.</p>                                    | <ul style="list-style-type: none"> <li>• Dimensioning objects</li> <li>• Quantifying liquids</li> <li>• Determining temperatures of environment, surfaces and liquids</li> <li>• Determining pressure in gases and liquids</li> </ul>   |

**Achievement Criteria:**

**Performance** The learner will describe the use of common measurement tools found in the marine industry and demonstrate their use.

**Conditions** The learner will require:

- Measurement tools necessary to demonstrate their use
- Objects and conditions that can be measured.
- A suitable work space for making measurements.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

**LINE (GAC):** F **TOOLS & EQUIPMENT**  
**Competency:** F1 **Use Common Hand Tools**

**Objectives:**

To be competent in this area, the individual must be able to describe, and demonstrate the use and maintenance of basic hand tools commonly found in the marine industry.

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| <p>1. Select and use common hand tools.</p> <p>2. Maintain hand tools.</p> | <ul style="list-style-type: none"> <li>• Common hand tools</li> <li>• Woodworking tools</li> <li>• Tools for composite materials</li> <li>• Mechanics' tools</li> <li>• Electricians' tools</li> <br/> <li>• Care of hand tools</li> <li>• Cleaning, sharpening &amp; repair</li> <li>• Grinding and honing edge tools</li> </ul> |
|--|---|

**Achievement Criteria:**

- |             |  |

**LINE (GAC):**      **K    COMPOSITE REPAIRS**  
**Competency:**    **K7      Clean & Maintain Gel Coat Surfaces**

**Objectives:**

To be competent in this area, the individual must be able to:

- Describe gel coat gloss deterioration.
- To clean, remove stains and polish gel coat surfaces.

**LEARNING TASKS**

**CONTENT**

- |   |   |
|---|---|
| <ol style="list-style-type: none"> <li>1. Describe the common cosmetic problems of gel coated surfaces.</li> <li>2. Clean gel coat surfaces.</li> <li>3. Polish gel coat surfaces.</li> </ol> | <ul style="list-style-type: none"> <li>• Manufacturing defects</li> <li>• Environmental exposure</li> <li>• Impact &amp; stress</li> <li>• Cleaner selection</li> <li>• Routine cleaning</li> <li>• Stain removal</li> <li>• Abrasive polishes</li> <li>• Polishing equipment &amp; techniques</li> <li>• Waxes &amp; synthetic finishes</li> </ul> |
|---|---|

**Achievement Criteria:**

**Performance**    The learner will describe common cosmetic problems with gel coat surfaces and demonstrate cleaning and polishing techniques.

**Conditions**      The learner will require:

- A selection of commonly used cleaners and polishes for gel coat and cleaning/polishing equipment.
- Sample gel coat surfaces.
- A work place or training environment.

**Criteria**            The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer’s specifications
- Conducted according to work place requirements

**LINE (GAC):**      **K**    **COMPOSITE REPAIRS**  
**Competency:**    **K8**      **Repair Gel Coat Damage**

**Objectives:**

To be competent in this area, the individual must be able to repair gel coat damage where application of new material will be required.

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. Assess deteriorated gel coat surfaces and recommend appropriate repairs.</li> <br/> <li>2. Describe procedures for repairs to gel coat damage.</li> <br/> <li>3. Repair damaged gel coat surfaces.</li> <br/> <li>4. Repair damaged gel coat non-skid surfaces.</li> </ol> | <ul style="list-style-type: none"> <li>• Surface evaluation</li> <li>• Limits to re-gel coating</li> <li>• Refinishing alternatives</li> <br/> <li>• Damage assessment</li> <li>• Voids</li> <li>• Gouges &amp; fastener holes</li> <li>• Colour matching</li> <li>• Fillers &amp; additives</li> <li>• Application techniques</li> <li>• Sanding and finishing</li> <br/> <li>• Preparation of repair area</li> <li>• Selecting and mixing resin and additives</li> <li>• Application techniques</li> <li>• Sanding and finishing</li> <br/> <li>• Preparation of repair area</li> <li>• Selecting and mixing resin and additives</li> <li>• Application techniques</li> </ul> |
|--|---|

**Achievement Criteria:**

Performance The learner will:

- Identify and evaluate gel coat damage.
- Perform gel coat repair procedures.

Conditions The learner will require:

- Tools
- Materials
- A work place

Criteria The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC):**      **K**    **COMPOSITE REPAIRS**  
**Competency:**    **K9**      **Repair Single Skin Structural Damage in Composites**

**Objectives:**

To be competent in this area, the individual must be able to assess, prepare, re-laminate and resurface structural damage to an un-cored (single skin) laminate.

**LEARNING TASKS**

**CONTENT**

- |   |   |
|---|---|
| <ol style="list-style-type: none"> <li>1. Describe methods for assessing damage to single skin laminates</li> <br/> <li>2. Describe how laminate design will influence repair procedures.</li> <br/> <li>3. **LINE (GAC): G MATERIALS**

**Competency: G8 Describe and Select Fasteners**

**Objectives:**

To be competent in this area, the individual must be able to describe and select common types of fasteners used for marine applications.

**LEARNING TASKS**

**CONTENT**

1. Identify and describe materials used for fasteners.

- Bronze
- Copper
- Stainless
- Galvanized
- Aluminum
- Plastic

2. Identify and select metal fasteners for common marine applications.

- Fastener types
- Corrosion considerations
- Sizing fasteners
- Appropriate selection
- Special fasteners

**LINE (GAC): G MATERIALS**

**Competency: G9 Select & Use Adhesives & Bedding Compounds**

**Objectives:**

To be competent in this area, the individual must be able to:

- Describe the characteristics of marine adhesives and bedding compounds.
- Select appropriate materials and demonstrate their use.

**LEARNING TASKS**

**CONTENT**

- |   |  |
|---|--|
| <p>1. Identify and describe commonly used marine adhesive materials and bedding compounds.</p>            | <ul style="list-style-type: none"> <li>• Wood glues</li> <li>• Composites adhesives</li> <li>• Bonding metals, glass and thermoplastics</li> <li>• Sealants &amp; bedding compounds</li> <li>• Specialty products</li> </ul> |
| <p>2. Select appropriate materials and follow bonding procedures for adhesives and bedding compounds.</p> | <ul style="list-style-type: none"> <li>• Material compatibility</li> <li>• Joint design</li> <li>• Surface preparation</li> <li>• Application</li> <li>• Clean up</li> </ul>   |

**Achievement Criteria:**

**Performance** The learner will select appropriate adhesives or bedding compounds for common marine workplace situations and demonstrate their application.

**Conditions** The learner will require:

- A selection of adhesives and bedding compounds
- Adequate materials for demonstrating their use.
- A work place or training environment.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

**LINE (GAC): G MATERIALS**

**Competency: G10 Select & Use Abrasive Materials**

**Objectives:**

To be competent in this area, the individual must be able to select and use abrasives and associated tools for common marine applications.

**LEARNING TASKS**

**CONTENT**

- |   |  |
|---|--|
| <p>1. Describe the composition and appropriate uses of common abrasive materials and tools.</p>               | <ul style="list-style-type: none"> <li>• How abrasives work</li> <li>• Abrasive materials</li> <li>• Backing fabrics</li> <li>• Adhesive materials</li> <li>• Sizing compounds</li> <li>• Grading system</li> <li>• Belts, papers, discs</li> <li>• Abrasive polishing compounds</li> <li>• Sanders</li> <li>• Grinders</li> <li>• Polishers</li> <li>• Specialty tools</li> </ul> |
| <p>2. Select and use abrasive materials and tools for various applications in wood, composites or metals.</p> | <ul style="list-style-type: none"> <li>• Woodworking abrasives operations</li> <li>• Composites abrasives operations</li> <li>• Metal abrasives operations</li> </ul>  |

**Achievement Criteria:**

**Performance** The learner will select and use abrasives and associated tools for common marine applications with wood, metal or composite materials.

- Conditions** The learner will require:
- A selection of abrasives.
  - A selection of abrasive tools.
  - Materials for demonstrating their use.
  - A work place or training environment.

- Criteria** The learner will be competent once the performance criteria is met:
- Followed safe work practices throughout the entire task
  - Conducted in a logical manner
  - Conducted according to manufacturer’s specifications
  - Conducted according to work place requirements

**LINE (GAC):** I **MARINE METALS**  
**Competency:** I1 **Perform Drilling & Cutting Operations in Metals**

**Objectives:**

To be competent in this area, the individual must be able to perform basic drilling and cutting operations in marine metals.

**LEARNING TASKS**

**CONTENT**

- |                                   |  |
|-----------------------------------|--|
| 1. Drill and tap holes in metals. | <ul style="list-style-type: none"> <li>• Drills and bits for metals</li> <li>• Sharpening bits</li> <li>• Lubricants and heat control</li> <li>• Drilling in steel</li> <li>• Drilling in stainless steel</li> <li>• Drilling in bronze</li> <li>• Drilling in aluminum</li> <li>• Tapping procedures</li> </ul> |
| 2. Cut and shape metals.          | <ul style="list-style-type: none"> <li>• Saws</li> <li>• Files</li> <li>• Grinders</li> <li>• Polishing procedures</li> </ul>  |
| 3. Cut threads in metal rod.      | <ul style="list-style-type: none"> <li>• Dies</li> <li>• Cutting threads</li> </ul>  |

**Achievement Criteria:**

**Performance** The learner will perform basic drilling, cutting, tapping and threading operations with common marine metals.

**Conditions** The learner will require:

- A selection of metalworking tools
- Materials adequate for demonstrating drilling, cutting, tapping and threading operations.
- A work place or training environment.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

**LINE (GAC):**      **K**    **COMPOSITE REPAIRS**  
**Competency:**    **K1**      **Repair Damage to FRP Laminates**

**Objectives:**

To be competent in this area, the individual must be able to repair structural damage to FRP hull and deck structures.

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. Describe assessment and repair of delaminated core areas by injecting resin.</li> <br/> <li>2. Repair cored structures with simple damage to the outer skin and core only.</li> <br/> <li>3. Repair single skin hull or deck structures and cored structures with damage to both skins and core.</li> <br/> <li>4. Describe the problems associated with teak decking over a cored composite structure.</li> <br/> <li>5. Excavate damaged cores and re-build deck structure.</li> </ol> | <ul style="list-style-type: none"> <li>• Causes of delamination</li> <li>• Sounding the extent of delamination</li> <li>• Assessing dry delamination</li> <li>• Drilling and injecting resin into voids</li> <br/> <li>• Damage assessment</li> <li>• Skin removal</li> <li>• Core repair/replacement</li> <li>• Isolating fittings</li> <li>• Re-lamination</li> <br/> <li>• Problems of access</li> <li>• Repairing inside skins</li> <br/> <li>• Teak decks and associated core problems</li> <br/> <li>• Removing teak decking</li> <li>• Cutting open water damaged decks and excavating core materials</li> <li>• Preparing and installing new core</li> <li>• Re-lamination</li> </ul> |
|--|---|

**Achievement Criteria:**

Performance The learner will repair structural damage to single skin and cored FRP hull and deck structures.

Conditions The learner will require:

- Tools.
- FRP Materials.
- A work place.
- Damaged FRP components.

Criteria The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC):**      **K**    **COMPOSITE REPAIRS**  
**Competency:**    **K3**      **Repair Composite Sailboat Fin Keel & Supporting Structure**

**Objectives:**

To be competent in this area, the individual must be able to assess and repair major structural damage associated with fin keel impacts.

**LEARNING TASKS**

**CONTENT**

- |   |   |
|---|---|
| <ol style="list-style-type: none"> <li>1. Assess structural damage to fin-keeled sailboat hull as a result of keel impact.</li> <br/> <li>2. **Achievement Criteria:**

**Performance** The learner will describe the process of osmosis and resulting damage to composite structures, and perform the procedures necessary to achieve an effective repair.

**Conditions** The learner will require:

- Tools.
- FRP materials.
- A work place.
- Vessels with osmosis damage.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC): L MECHANICAL SYSTEMS**

**Competency: L2 Describe Engine Room Layout & Ventilation**

**Objectives:**

To be competent in this area, the individual must be able to:

- Describe principles of engine room layout.
- Describe principles of engine space ventilation.

**LEARNING TASKS**

**CONTENT**

1. Describe the relationships between engine components and their optimal layout in the engine room.
  
2. Describe the function and components of engine room ventilation systems.

- Engines
- Tanks
- Batteries
- Exhaust
- Access
- Weight distribution
- Insulation
- Fire protection & coatings
- Painting engine components
  
- Combustion air
- Ventilation air
- Vapour removal
- Vents & ducting sizing
- Blowers

**LINE (GAC): L MECHANICAL SYSTEMS**

**Competency: L10 Service Engine Mounts, Shafting & Alignment**

**Objectives:**

To be competent in this area, the individual must be able to:

- Service stuffing boxes, seals and shaft bearings.
- Align inboard engines to drive train.

**LEARNING TASKS**

**CONTENT**

- |   |  |
|---|--|
| <p>1. Describe engine alignment procedures.</p>                                   | <ul style="list-style-type: none"> <li>• Feeler gauges</li> <li>• Pry bars</li> <li>• Shims</li> <li>• Alignment procedures</li> <li>• Tolerances</li> </ul>   |

| <p>3. Alignment of propeller shafts.</p>  | <ul style="list-style-type: none"> <li>• Shaft log</li> <li>• Struts &amp; v-struts</li> <li>• Wire alignment method</li> <li>• Laser alignment method</li> </ul>  |

**Achievement Criteria:**

Performance The learner will perform procedures for aligning engine to drive train, stuffing box repacking, replacing bearings and aligning shafts.

Conditions The learner will require:

- Tools.
- Vessels with inboard drive trains.

Criteria The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC): L MECHANICAL SYSTEMS**

**Competency: L11 Service Propellers**

**Objectives:**

To be competent in this area, the individual must be able to:

- Assess propeller damage.
- Remove and replace propellers.

**LEARNING TASKS**

**CONTENT**

<p>1. Assess and describe the significance of propeller damage or wear.</p> <p>2. Describe procedures to remove and replace propellers.</p>	<ul style="list-style-type: none"> <li>• Mechanical damage</li> <li>• Cavitation damage</li> <li>• Corrosion damage</li>   <li>• Pullers</li> <li>• Heating</li> <li>• Safety</li> <li>• Nuts, keys &amp; keyways</li> <li>• Tapers and fitting</li> </ul>
---	--

**Achievement Criteria:**

Performance	The learner will assess propeller damage and perform procedures for removing and replacing propellers.
Conditions	The learner will require: <ul style="list-style-type: none"> <li>• Propellers, shafts and keys.</li> <li>• Tools for propeller removal/replacement.</li> <li>• A work place or training environment.</li> </ul>
Criteria	The learner will be competent once the performance criteria is met: <ul style="list-style-type: none"> <li>• Followed safe work practices throughout the entire task</li> <li>• Conducted in a logical manner</li> <li>• Conducted according to manufacturer's specifications</li> <li>• Conducted according to work place requirements</li> </ul>

**LINE (GAC):**        **O**    **ELECTRICAL SYSTEMS**  
**Competency:**     **O3**     **Perform Basic Wiring & Testing Procedures**

**Objectives:**

To be competent in this area, the individual must be able to:

- Interpret basic 12V DC wiring diagrams.
- Install common electrical components.
- Use a multi-meter to perform basic tests.

**LEARNING TASKS**

**CONTENT**

- |   |  |
|---|--|
| <ol style="list-style-type: none"> <li>1. Identify common symbols used in wiring diagrams and interpret wiring diagrams.</li> <br/> <li>2. Perform basic wiring procedures to install simple 12V electrical appliances.</li> <br/> <li>3. **Achievement Criteria:**

**Performance** The learner will demonstrate the commonly used stationary power tools used in boatyard workplaces, their operation, maintenance and adjustment.

**Conditions** The learner will require:

- Tools.
- Access to stationary power tools commonly found in the boatyard workplace.
- Stock materials to demonstrate tool operation.
- A work place or training environment.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

**LINE (GAC): H FABRICATION**

**Competency: H1 Fabricate Plug, Mold, & Composites Part**

**Objectives:**

To be competent in this area, the individual must be able to:

- Fabricate a simple plug.
- Make a mold from the plug.
- Produce a composites part from the mold.

**LEARNING TASKS**

**CONTENT**

1. Describe the basic design considerations for building plugs and molds.	<ul style="list-style-type: none"> <li>• Part shape &amp; draw angles</li> <li>• Single and multi-component molds</li> <li>• Shop conditions</li> </ul>
2. Select appropriate materials and fabricate a simple plug.	<ul style="list-style-type: none"> <li>• Plaster, clay, FRP, wood, foam</li> <li>• Material effect on cure</li> <li>• Finishing materials</li> <li>• Polishing procedures</li> <li>• Release agents</li> <li>• Plug reinforcing, handling &amp; storage</li> </ul>
3. Select appropriate materials and fabricate a mold from the plug fabricated in (2).	<ul style="list-style-type: none"> <li>• Gel coat or paint surfaces</li> <li>• Lay up materials, resins/reinforcements</li> <li>• Layup sequence</li> <li>• Stiffening alternatives</li> <li>• Curing molds</li> <li>• Mold storage</li> </ul>
4. Select appropriate materials and lay up a structure using the mold fabricated in (3).	<ul style="list-style-type: none"> <li>• Mold release</li> <li>• Material choices for finish &amp; structure</li> <li>• Layup sequence</li> <li>• Part release</li> <li>• Part curing &amp; trimming</li> </ul>
5. Describe elastomeric tooling and casting techniques.	<ul style="list-style-type: none"> <li>• Silicone &amp; latex molds</li> <li>• Urethane, epoxy &amp; polyester casting compounds</li> </ul>

**Achievement Criteria:**

**Performance** The learner will fabricate a simple plug, make a mold from the plug and produce a composites part from the mold.

**Conditions** The learner will require:

- Materials for plug fabrication.
- Composites resins and reinforcements.
- Tools for composites layups.
- A work place or training environment.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

**LINE (GAC):** H **FABRICATION**  
**Competency:** H4 **Perform Vacuum Bag Laminating**

**Objectives:**

To be competent in this area, the individual must be able to laminate single skin and cored structures using various vacuum bag techniques.

**LEARNING TASKS**

| <p>4. Troubleshoot and repair engine gauges.</p>  | <ul style="list-style-type: none"> <li>• Tachometers</li> <li>• Temperature</li> <li>• Oil pressure</li> <li>• Fuel system and tank levels</li> </ul>  |

**Achievement Criteria:**

**Performance** The learner will perform adjustment procedures for inboard engine mechanical controls and troubleshoot engine alarms and gauges.

**Conditions** The learner will require:

- Tools.
- Engine manuals or online access.
- Replacement parts.
- Marine engines.
- A work place.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC):** L    **MECHANICAL SYSTEMS**  
**Competency:** L9    **Install & Service Steering Gear**

**Objectives:**

To be competent in this area, the individual must be able to perform procedures to install, troubleshoot and service common steering systems.

**LEARNING TASKS**

**Achievement Criteria:**

**Performance** The learner will identify and describe the characteristics of typical thermoplastic materials used in the marine workplace and demonstrate drilling and cutting techniques.

**Conditions** The learner will require:

- A representative sample of common thermoplastic materials.
- Stock thermoplastic material.
- Tools and equipment.
- A work place or training environment.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

**LINE (GAC): H FABRICATION**

**Competency: H3 Sheath Wood Structure with Composite Materials**

**Objectives:**

To be competent in this area, the individual must be able to:

- Sheath wood structures with a gloss epoxy/fabric layup.
- Sheath wood structures with a utility polyester/glass layup.

**LEARNING TASKS**

**CONTENT**

<p>1. Sheath a finished wooden component with epoxy resin and fibreglass cloth to produce a clear sealed cosmetic finish.</p> <p>2. Sheath a wooden structure with polyester resin and a mat/cloth lay-up to reinforce and seal the component.</p>	<ul style="list-style-type: none"> <li>• Surface preparation</li> <li>• Laminating &amp; curing conditions</li> <li>• Resin &amp; reinforcement choices</li> <li>• Sheathing procedures</li> <li>• UV protection &amp; surface finishes</li>   <li>• Suitability for sheathing</li> <li>• Surface filling &amp; fairing</li> <li>• Sealing with polyester</li> <li>• Lay-up schedule &amp; procedures</li> <li>• Filling &amp; fairing</li> <li>• Finishing coatings</li> </ul>
--	---

**Achievement Criteria:**

**Performance** The learner will sheath wood with epoxy/fabric and polyester/glass coverings.

**Conditions** The learner will require:

- Raw wood structures suitable for sheathing.
- Composites resins and reinforcements.
- Tools and equipment.
- A work place or training environment.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

**Achievement Criteria:**

**Performance** The learner will undertake cold molding operations to construct major vessel components and make repairs to cold molded structures.

**Conditions** The learner will require:

- Tools.
- Wood stock materials.
- Molds/forms.
- Composites resins and reinforcements.
- A work place.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC): H FABRICATION**

**Competency: H6 Perform Wood Lamination Operations**

**Objectives:**

To be competent in this area, the individual must be able to perform typical wood lamination techniques.

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. Describe appropriate applications for laminated wood structures.</li> <br/> <li>2. Build laminated wood components by strip laminating.</li> <br/> <li>3. Build laminated wood components using vacuum bagging techniques.</li> <br/> <li>4. Replicate laminated components by using jigs and air pressure forming.</li> </ol> | <p>Wood lamination applications:</p> <ul style="list-style-type: none"> <li>• Beams</li> <li>• Spars</li> <li>• Frames</li> <li>• Keels</li> <li>• Stems</li> <li>• Knees</li> <br/> <li>• Selecting woods</li> <li>• Glues &amp; gluing procedures</li> <li>• Jig making</li> <li>• Clamping</li> <li>• Cleaning/finishing</li> <br/> <li>• Vacuum bagging equipment &amp; materials</li> <li>• Jigs</li> <li>• Vacuum bagging process</li> <br/> <li>• Appropriate applications</li> <li>• Use of jigs &amp; air equipment</li> </ul> |
|--|---|

**Achievement Criteria:**

Performance The learner will construct laminated wood components using traditional methods and vacuum bagging.

Conditions The learner will require:

- Tools.
- Wood materials.
- Forms and templates.
- Adhesives.
- A work place.

Criteria The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC):** J **WOODWORK REPAIRS**  
**Competency:** J3 **Perform Fairing & Cosmetic Operations in Wood**

**Objectives:**

To be competent in this area, the individual must be able to:

- Describe the elements of design and workmanship that contribute to the appearance of wood components.
- Perform high quality fairing and finishing operations.

**LEARNING TASKS**

**CONTENT**

- |   |  |
|---|--|
| <p>1. Describe elements of design and use of materials that contribute to the aesthetic qualities of wood components.</p> | <ul style="list-style-type: none"> <li>• Lines and proportions</li> <li>• Concept of fairness</li> <li>• Material selection</li> <li>• Colour &amp; texture</li> <li>• Hardware</li> <li>• Wood bungs</li> <li>• Finishes</li> </ul> |
| <p>2. Perform fairing and finishing operations with quality wood components.</p>  | <ul style="list-style-type: none"> <li>• Planing curved surfaces</li> <li>• Board sanding</li> <li>• Scraping</li> <li>• Power sanding</li> <li>• Finish sanding</li> <li>• Paints &amp; varnishes</li> </ul>                        |

**Achievement Criteria:**

**Performance** The learner will perform quality fairing and finishing on interior and exterior joinery and brightwork.

**Conditions** The learner will require:

- Tools.
- Rough fabricated joinery components.
- A work place.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC):** K **COMPOSITE REPAIRS**  
**Competency:** K6 **Repair High Performance FRP Structures**

**Objectives:**

To be competent in this area, the individual must be able to repair FRP structures using high performance materials.

**LEARNING TASKS**

**CONTENT**

- |  |  |
|--|--|
| <p>1. Describe the characteristics of high performance materials and manufacturing techniques.</p> | <ul style="list-style-type: none"> <li>• Carbon fibre, Kevlar®</li> <li>• Other high performance fabrics</li> <li>• Epoxy &amp; vinyl resin systems</li> <li>• Vacuum bagging</li> <li>• Resin wet-out systems</li> <li>• Hot bonders</li> </ul> |
| <p>2. ***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

# **Marine Service Technician**

## **Advanced Workplace Based Only**

**(Advanced competencies that are workplace based only, no  
institutional level training component)**

**LINE (GAC):**        **C**    **YARD PRACTICES**  
**Competency:**     **C4**     **Operate Power and Sail Vessels**

**Objectives:**

To be competent in this area, the individual must be able to operate, manoeuvre and dock power and sailing vessels over 25 feet in length in a marina environment.

<b>LEARNING TASKS</b>	<b>CONTENT</b>
1. Obtain a Canadian Pleasure Craft Operator Card.	<ul style="list-style-type: none"> <li>• Requirements for PCOC</li> </ul>
2. Interpret tide and current tables (where worker operates in tidal waters).	<ul style="list-style-type: none"> <li>• Tide tables</li> <li>• Current tables &amp; atlases</li> </ul>
3. Manoeuvre and safely dock power and sail vessels over 25 feet long from one location to another at marina docks.	<ul style="list-style-type: none"> <li>• Engine start up and shut down procedures</li> <li>• Casting off and manoeuvring from docks</li> <li>• Manoeuvring sailboats and inboard powered single-screw powerboats</li> <li>• Manoeuvring twin-screw power vessels and vessels with thrusters</li> <li>• Towing</li> <li>• Safe docking and securing procedures</li> </ul>

**Achievement Criteria:**

**Performance**    The learner will operate a variety of vessels over 25 feet, power and sail, and perform safe manoeuvres in a marina environment.

**Conditions**     The learner will require:

- Single screw power vessels over 25'.
- Twin screw power vessels over 25'
- Sailing vessels over 25'.
- A marina environment.

**Criteria**         The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC):** C **YARD PRACTICES**  
**Competency:** C5 **Operate Straddle Lift Equipment**

**Objectives:**

To be competent in this area, the individual must be able to:

- Operate and manoeuvre straddle lift equipment (Travelift™) to lift out and launch typical large vessels in a boatyard.
- Set up blocking and jack stands to support vessels on the hard.

**LEARNING TASKS**

**CONTENT**

- |                                     |   |
|-------------------------------------|---|
| 1. Operate straddle lift equipment. | <ul style="list-style-type: none"> <li>• Controls and operations</li> <li>• Safety issues</li> <li>• Lifting out vessels               <ul style="list-style-type: none"> <li>– Tidal considerations (tidal waters only)</li> <li>– Vessel hull types</li> <li>– Sling positioning</li> </ul> </li> <li>• Manoeuvring vessels in yard</li> <li>• Launching vessels</li> </ul> |
| 2. Set up blocking.                 | <ul style="list-style-type: none"> <li>• Vessel types and structural considerations</li> <li>• Jack stands</li> <li>• Wood blocking materials</li> <li>• Drums</li> <li>• Bilge blocking for keel repairs</li> <li>• Safety considerations</li> </ul>   |

**Achievement Criteria:**

Performance The learner will operate straddle lift equipment to lift and launch a variety of vessels and block them securely in a boatyard.

Conditions The learner will require:

- Travelift™ equipment.
- Vessels.
- Blocking equipment.
- A marina or boatyard environment

Criteria The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC):        G    MATERIALS**

**Competency:        G11     Select & Use Caulking Materials for Wood Vessels**

**Objectives:**

To be competent in this area, the individual must be able to:

- Select the materials and tools required.
- Perform caulking operations on traditional plank on frame hulls.

**LEARNING TASKS**

**CONTENT**

- |                                     |   |
|-------------------------------------|---|
| 1. Prepare for caulking operations. | <ul style="list-style-type: none"> <li>• Caulking theory</li> <li>• Plank on frame hulls</li> <li>• Deck construction</li> </ul>  |

- Woodworking tools.
  - Assorted hardwoods.
  - Plywoods and veneers.
  - A work place.

- Criteria**        The learner will be competent once the performance criteria is met:
- Followed safe work practices throughout the entire task
  - Conducted in a logical manner
  - Conducted according to manufacturer's specifications
  - Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC):        H    FABRICATION**  
**Competency:       H8        Install and Repair Teak Decking**

**Objectives:**

To be competent in this area, the individual must be able to remove, repair and install new teak decks.

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. Remove damaged teak decking.</li> <li>2. Repair and install teak decking.</li> <li>3. Lay out and install new teak decks.</li> </ol> | <ul style="list-style-type: none"> <li>• Fastened decking</li> <li>• Glued decking</li> <li>• Sub-deck assessment and repair</li> <br/> <li>• Repairs to individual planks/strips</li> <li>• Complete replacement</li> <br/> <li>• Layout and aesthetic factors               <ul style="list-style-type: none"> <li>○ Curves</li> <li>○ Mirroring</li> </ul> </li> <li>• Materials selection</li> <li>• Assembly and application</li> <li>• Vacuum bagging techniques</li> <li>• Caulking and finishing</li> </ul> |
|--|---|

**Achievement Criteria:**

**Performance**    The learner will repair, replace and install teak decking.

**Conditions**    The learner will require:

- Tools.
- Vessels with teak decks.
- A work place.

**Criteria**        The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer’s specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC):**       **I       MARINE METALS**  
**Competency:**     **I2       Weld Marine Metals**

**Objectives:**

To be competent in this area, the individual must be able to set up and perform TIG and MIG welding operations with typical marine metals.

**LEARNING TASKS**

**CONTENT**

- |                                    |   |
|------------------------------------|---|
| 1. Prepare for welding operations. | <ul style="list-style-type: none"> <li>• Beveling</li> <li>• Edge preparation</li> <li>• Sleeving and butt welding</li> </ul>   |
| 2. | 3. Fair and finish welds.          | <ul style="list-style-type: none"> <li>• Filing and fairing welds</li> <li>• Pickling and polishing welds</li> </ul>  |

**Achievement Criteria:**

**Performance**   The learner will prepare metal components for welding and use TIG and MIG equipment to weld stainless and aluminum components.

- Conditions**    The learner will require:
- Metalworking tools.
  - TIG welding equipment.
  - MIG welding equipment.
  - Stock marine metals.
  - A work place.

- Criteria**       The learner will be competent once the performance criteria is met:
- Followed safe work practices throughout the entire task
  - Conducted in a logical manner
  - Conducted according to manufacturer’s specifications
  - Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC):**       **I       MARINE METALS**  
**Competency:**     **I3       Fabricate with Marine Metals**

**Objectives:**

To be competent in this area, the individual must be able to:

- Design typical marine industry structures.
- Plan and lay out for fabrication.
- Cut, shape and bend marine metals and prepare for welding.
- Finish completed components ready for installation.

**LEARNING TASKS**

**CONTENT**

1. Plan and design typical marine components.	<ul style="list-style-type: none"> <li>• Purpose and nature of typical marine metal hardware</li> <li>• Design considerations</li> <li>• Materials selection</li> <li>• Layout procedures</li> <li>• Jig building</li> <li>• Fabrication procedures</li> <li>• Weld preparation</li> </ul>
2. Cut and shape stock materials.	<ul style="list-style-type: none"> <li>• Cutting</li> <li>• Filing</li> <li>• Grinding</li> <li>• Drilling</li> <li>• Tapping and thread cutting</li> </ul>
3. Bend pipe and tubing.	<ul style="list-style-type: none"> <li>• Pipe bending</li> <li>• Tube bending</li> </ul>
4. Prepare components for welding.	<ul style="list-style-type: none"> <li>• Plate stock bending</li> <li>• Edge prepping</li> <li>• Tacking</li> </ul>
5. Finish metal components.	<ul style="list-style-type: none"> <li>• Sanding</li> <li>• Polishing</li> <li>• Preparing aluminum for anodizing</li> </ul>

**Achievement Criteria:**

**Performance** The learner will plan, lay out and perform fabrication operations for typical applications in marine metals.

Note: This competency does **not** include welding.

**Conditions** The learner will require:

- Metalworking tools.
- Bending equipment.
- Stock marine metals.
- A work place.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**Line (GAC):** L      **MECHANICAL SYSTEMS**  
**Competency:** L12      **Repair & Adjust Propellers**

**Objectives:**

To be competent in this area, the individual must be able to:

- Repair propeller damage.
- Balance and adjust propellers.

**LEARNING TASKS**

**CONTENT**

- |  |  |

**LINE (GAC):**      **P**    **RIGGING INSTALLATIONS**  
**Competency:**    **P5**      **Tune Rigging**

**Objectives:**

To be competent in this area, the individual must be able to tune sailing vessel standing rigging for service requirements.

**LEARNING TASKS**

**CONTENT**

1. Tune racing and cruising sailing rigs.

- Tuning techniques
- Static and dynamic tuning
- Planning/organizing sea trials
- Racing vessels
- Cruising vessels
- Helm balance
- Sail shape

**Achievement Criteria:**

**Performance**    The learner will tune racing and cruising sailing rigs in static (at the dock) and dynamic (underway) situations.

**Conditions**    The learner will require:

- Tools.
- Various sailing vessels.

**Criteria**        The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

**LINE (GAC): P RIGGING INSTALLATIONS**

**Competency: P6 Assemble Spars**

**Objectives:**

To be competent in this area, the individual must be able to prepare and assemble spars and spar hardware from components supplied.

**LEARNING TASKS**

**CONTENT**

1. Assemble spar components.

- Masts, spreaders
- Masthead
  - Blocks and sheaves
  - Aerials
  - Electrical wiring and routing conductors
- Mast foot and step hardware
- Lighting and electronics mounting
- Booms and other spars
- Sail tracks
- In-spar roller furling equipment
- Fasteners and equipment installation to spars

**Achievement Criteria:**

**Performance** The learner will assemble sailing vessel spars and related hardware.

**Conditions** The learner will require:

- Tools.
- Assorted spar components.
- A work place.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer's specifications

**Achievement Criteria:**

**Performance** The learner will assess inflatable vessels for routine maintenance and repair, perform maintenance procedures and perform repairs to damage inflatable structures.

**Conditions** The learner will require:

- Tools.
- Fabrics and adhesives.
- Inflatable vessels.
- A work place.

**Criteria** The learner will be competent once the performance criteria is met:

- Followed safe work practices throughout the entire task
- Conducted in a logical manner
- Conducted according to manufacturer’s specifications
- Conducted according to work place requirements

***Throughout the term of the apprenticeship, the learner must conduct the above performance a multiple of times and in a variety of contexts.***

# Section 4

## TRAINING PROVIDER STANDARDS

## Facility Requirements

### CLASSROOM AREA

- Recommended 2.5 Sq. meters per student
- Projection screen, multimedia projector, whiteboard or similar
- Seating and tables suitable for lecturing
- Compliance with all safety codes

### SHOP AREA

- Recommended 25 Sq. meters per student
- Meet all safety and fire, and environmental codes
- Good lighting
- Approved ventilation systems

### LAB REQUIREMENTS

- Recommended 10 Sq. meters per student

### STUDENT FACILITIES

- 1 locker per student, study areas, food facility, hand wash facility, washroom facility.

### INSTRUCTOR'S OFFICE SPACE

- Recommended 3.5 Sq. Meters

### OTHER

- Storage space for classroom and shop props.

## Tools and Equipment

### LEVEL 1

#### SHOP EQUIPMENT

##### *Required*

- fire extinguishers
- 10" - ½" line
- access to moored vessels
- access to boatyard facility or simulation
- access to jack stands
- compressed air system

#### SHOP (FACILITY) TOOLS

##### *Standard Tools*

- tape measure
- micrometer
- vernier
- digital weigh scales
- callipers
- liquid volume containers
- standard thermometer
- laser thermometer
- air pressure gauge
- slot screwdriver
- Robertson screwdriver
- Phillips screwdriver
- awl
- hack saw
- carpenter's hand saw
- coping saw
- box wrench set
- socket wrench set
- allen key set
- adjustable wrench
- standard pliers
- needle nose pliers

- side cutters
- wire crimper/stripper
- utility knife
- ball peen hammer
- mallet
- assorted resin mixing containers
- stir sticks
- shears
- squeegee
- laminate roller
- sanding block
- sander/polisher
- buffing pads

### ***Specialty Tools***

- die grinder
- angle grinder
- assorted grinding discs
- space heater
- multi-meter

### **SAFETY EQUIPMENT (SUPPLIED BY SCHOOL)**

- eye protection
- hearing protection
- rubber gloves
- dust mask

Safety Equipment (supplied by student)

- respirator with VOC cartridge
- coveralls
- safety shoes

## **LEVEL 2**

### **SHOP EQUIPMENT**

#### ***Required***

- compressed air system
- air hose and fittings

- drill press
- band saw
- belt sander

## SHOP (FACILITY) TOOLS

### *Standard Tools*

- straight edge
- battens
- caulking gun
- portable drill
- high speed drill bits
- hole saw kit
- angle grinder
- assorted grinding discs
- assorted sanding blocks
- long board
- sander/polisher
- sabre saw
- siphon/gravity feed spray gun
- assorted metalworking files
- taps/dies
- propane torch
- multi-meter
- polarity tester

### *Specialty Tools*

- propeller puller
  -

## STUDENT EQUIPMENT (SUPPLIED BY SCHOOL)

- eye protection
- hearing protection
- rubber gloves
- dust mask

### Safety Equipment (supplied by student)

- respirator with VOC cartridge
- coveralls
- safety shoes

## LEVEL 3

### SHOP EQUIPMENT

#### *Required*

- table saw
- band saw
- jointer
- drill press
- ventilation system

#### *Recommended*

- thickness planer
  -

### SHOP (FACILITY) TOOLS

#### *Standard Tools*

- assorted resin mixing containers
- stir sticks
- shears
- squeegee
- laminate roller
- sanding block
- sander/polisher
- buffing pads
- slot screwdriver
- Robertson screwdriver
- Phillips screwdriver
- box wrench set
- socket wrench set
- allen key set
- adjustable wrench
- standard pliers
- needle nose pliers
- portable drill
- high speed drill bits
- hole saw kit
- angle grinder
- assorted grinding discs

**STUDENT EQUIPMENT (SUPPLIED BY SCHOOL)**

- eye protection
- hearing protection
- rubber gloves

Safety Equipment (supplied by student)

- respirator with VOC cartridge
- coveralls
- safety shoes

**LEVEL 4****SHOP EQUIPMENT**

- table saw
- band saw
- drill press
- ventilation system

**SHOP (FACILITY) TOOLS*****Standard Tools***

- assorted resin mixing containers
- stir sticks
- squeegee
- shears
- laminate roller
- sanding block
- sander/polisher
- buffing pads
- heat gun
- portable drill
- high speed drill bits
- hole saw kit
- angle grinder
- assorted grinding discs

**STUDENT EQUIPMENT (SUPPLIED BY SCHOOL)*****Required***

- eye protection
- hearing protection
- rubber gloves

Safety Equipment (supplied by student)

- respirator with VOC cartridge
- coveralls
- safety shoes

## Instructor Requirements

### OCCUPATION QUALIFICATION

Instructors must possess:

- Trade certification in MST (formerly MRT) or other marine related trade certificate, or a minimum of 10 years trade experience working in the subject matter area.

### WORK EXPERIENCE

- A minimum of 10 years experience working in the recreational marine industry.

### INSTRUCTIONAL EXPERIENCE AND EDUCATION

It is preferred that instructors also possess the following:

- Teaching experience in adult learning settings
- Diploma or certificate of completion in an adult education training program
- ABYC certification
