Section 1
INTRODUCTION

Automotive Service Technician (AST)
Foundation
Foreword

This revised Automotive Service Technician Program Outline is intended as a guide for instructors, apprentices, and employers of apprentices as well as for the use of industry organizations, regulatory bodies, and provincial and federal governments. It reflects updated standards based on the 2016 Red Seal Occupational Standard (RSOS) and the Automotive Service Technician Occupational Analysis (2016) and British Columbia industry and instructor subject matter experts.

Practical instruction by demonstration and student participation should be integrated with classroom sessions. Safe working practices, even though not always specified in each operation or topic, are an implied part of the program and should be stressed throughout the apprenticeship.

This Program Outline includes a list of recommended reference textbooks that are available to support the learning objectives and the minimum shop requirements needed to support instruction.

The Program Outline was prepared with the advice and assistance of the Automotive Service Technician Review Committee and will form the basis for further updating of the British Columbia Automotive Service Technician Program by the Industry Training Authority (ITA).

Competencies are to be evaluated through written exams and practical assessments. A passing grade is achieved by getting an overall mark of 70%. See the Assessment Guidelines in the Appendix for more details. The types of questions used on these exams must reflect the cognitive level indicated by the learning objectives and the learning tasks listed in the related competencies.

Achievement Criteria are included for those competencies that require a practical assessment. The intent of including Achievement Criteria in the Program Outline is to ensure consistency in training across the many training institutions in British Columbia. Their purpose is to reinforce the theory and to provide a mechanism for evaluation of the learner’s ability to apply the theory to practice. It is important that these performances be observable and measurable and that they reflect the skills spelled out in the competency as those required of a competent journeyperson. The conditions under which these performances will be observed and measured must be clear to the learner as well as the criteria by which the learner will be evaluated. The learner must also be given the evaluation criteria.

The performance spelled out in the Achievement Criteria is a suggested performance and is not meant to stifle flexibility of delivery. Training providers are welcome to substitute other practical performances that measure similar skills and attainment of the competency. Multiple performances may also be used to replace individual performances where appropriate.

SAFETY ADVISORY

Be advised that references to the WorkSafeBC safety regulations contained within these materials do not/may not reflect the most recent Occupational Health and Safety Regulation the current Standards and Regulation in BC can be obtained on the following website: http://www.worksafebc.com. Please note that it is always the responsibility of any person using these materials to inform him/herself about the Occupational Health and Safety Regulation pertaining to his/her work.
Acknowledgements

Industry and Instructor Subject Matter Experts retained to assist in the development of the Occupational Analysis Chart and the Program Profile:

- Jamie Bloomfield  Okanagan College
- Dean Cadieux  Vancouver Island University
- Jeff Hoff  Napa AutoPro
- Russ Hunter  BC Institute of Technology
- Robert Kunka  Vancouver Community College
- Nic Nelson  Foreman's Integra Tire Auto Centre
- Loi Truong  Mercedes-Benz
- Matt Wilkie  Cloverdale Auto Repair

Industry and Instructor Subject Matter Experts retained to assist in the development of the Program Outline for AST 1,2,3 and 4, on which this FDN outline is based:

- Jamie Bloomfield  Okanagan College
- Dean Cadieux  Vancouver Island University
- Jeff Hoff  Napa AutoPro
- Russ Hunter  BC Institute of Technology
- Robert Kunka  Vancouver Community College
- Nic Nelson  Foreman's Integra Tire Auto Centre
- Loi Truong  Mercedes-Benz
- Chris Wylie  Searles Auto Repair

The Industry Training Authority would like to acknowledge the dedication and hard work of all the industry and training provider representatives appointed to identify the training requirements of the Automotive Service Technician (AST) occupation.
# How to Use this Document

This Program Outline has been developed for the use of individuals from several different audiences. The table below describes how each section can be used by each intended audience.

<table>
<thead>
<tr>
<th>Section</th>
<th>Training Providers</th>
<th>Employers/ Sponsors</th>
<th>Apprentices</th>
<th>Challengers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program Credentialing Model</td>
<td>Communicate program length and structure, and all pathways to completion</td>
<td>Understand the length and structure of the program</td>
<td>Understand the length and structure of the program, and pathway to completion</td>
<td>Understand challenger pathway to Certificate of Qualification</td>
</tr>
<tr>
<td>OAC</td>
<td>Communicate the competencies that industry has defined as representing the scope of the occupation</td>
<td>Understand the competencies that an apprentice is expected to demonstrate in order to achieve certification</td>
<td>View the competencies they will achieve as a result of program completion</td>
<td>Understand the competencies they must demonstrate in order to challenge the program</td>
</tr>
<tr>
<td>Training Topics and Suggested Time Allocation</td>
<td>Shows proportionate representation of general areas of competency (GACs) at each program level, the suggested proportion of time spent on each GAC, and percentage of time spent on theory versus practical application</td>
<td>Understand the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application</td>
<td>Understand the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application</td>
<td>Understand the relative weightings of various competencies of the occupation on which assessment is based</td>
</tr>
<tr>
<td>Program Content</td>
<td>Defines the objectives, learning tasks, high level content that must be covered for each competency, as well as defining observable, measurable achievement criteria for objectives with a practical component</td>
<td>Identifies detailed program content and performance expectations for competencies with a practical component; may be used as a checklist prior to signing a recommendation for certification (RFC) for an apprentice</td>
<td>Provides detailed information on program content and performance expectations for demonstrating competency</td>
<td>Allows individual to check program content areas against their own knowledge and performance expectations against their own skill levels</td>
</tr>

**Note:** AST Foundation Programs must cover the outcomes of the Level 1 program that is in effect. Content that exceeds the Level 1 outcomes is added at the discretion of the training provider. Please see Appendix A for sample optional content.
Section 2

PROGRAM OVERVIEW

Automotive Service Technician (AST)
Program Credentialing Model

Apprenticeship Pathway

This graphic provides an overview of the Automotive Service Technician apprenticeship pathways.

Automotive Service Technician Level 4
- Technical Training: 210 hours
- WBT: 6,360 hours
- ITA Standardized Written Exam
- Interprovincial Red Seal Exam

Automotive Service Technician 3
- Technical Training: 210 hours
- Accumulate work-based training hours
- ITA Certificate of Qualification Exam

Automotive Service Technician 2
- Technical Training: 210 hours
- Accumulate work-based training hours
- ITA Certificate of Qualification Exam

Automotive Service Technician 1
- Technical Training: 210 hours
- Accumulate work-based training hours
- ITA Certificate of Qualification Exam

Automotive Service Technician Foundation Program
- Technical Training: 900 hours

APPRENTICESHIP - DIRECT ENTRY

CROSS-PROGRAM CREDITS

Individuals who hold the credentials listed below are entitled to receive partial credit toward the completion requirements of these programs:

- C of Q = Certificate of Qualification
- C of A = Certificate of Apprenticeship
- C of C = Certificate of Completion
- WBT = Work-Based Training

- C of Q Truck and Transport Mechanic
  - Technical Training: None
  - Work-Based Training: 1,590 hours*

- C of Q Heavy Duty Equipment Technician
  - Technical Training: None
  - Work-Based Training: 1,590 hours*

*Individuals who are holders of both certificates will only be awarded credit for 1,590 WBT hours total
**Occupational Analysis Chart**

**AUTOMOTIVE SERVICE TECHNICIAN**

**Occupation Description:** “Automotive Service Technicians” possess the full range of knowledge and abilities required to perform preventative maintenance, diagnose problems and repair vehicle systems including engines, vehicle management, hybrids, steering, braking, tires, wheels, drivetrains, suspension, electrical, electronics, heating, ventilation and air conditioning (HVAC), restraints, trim and accessories of automotive vehicles and light trucks with a gross vehicle weight less than 5,500 kg.

HARMONIZED PROGRAM
Program Overview

DIAGNOSE AND REPAIR GASOLINE ENGINE SUPPORT SYSTEMS

- Diagnose and repair advanced wiring and electronics
- Diagnose and repair gasoline fuel delivery and injection systems
- Diagnose and repair gasoline ignition systems
- Diagnose and repair engine management systems
- Diagnose and repair gasoline intake and exhaust systems
- Diagnose and repair gasoline emissions control systems

DIAGNOSE AND REPAIR DIESEL ENGINE SUPPORT SYSTEMS

- Diagnose and repair diesel fuel delivery and injection systems
- Diagnose and repair diesel intake and exhaust systems
- Diagnose and repair diesel emission control systems

DIAGNOSE AND REPAIR VEHICLE NETWORKING SYSTEMS

- Identify type of networking system
- Diagnose and repair networking systems

DIAGNOSE AND REPAIR DRIVELINE SYSTEMS

- Diagnose and repair drive shafts and axles
- Diagnose and repair manual transmissions and transaxles
- Diagnose and repair automatic transmissions and transaxles
- Diagnose and repair clutches
- Diagnose and repair mechanical transfer cases
- Diagnose and repair all-wheel drive (AWD) systems
- Diagnose and repair final drive assemblies

DIAGNOSE AND REPAIR ELECTRICAL SYSTEMS AND COMPONENTS

- Diagnose and repair basic wiring and electrical systems
- Diagnose and repair starting and charging systems and batteries
- Diagnose and repair lighting and wiper systems
- Diagnose and repair electrical options and accessories
- Diagnose and repair instrumentation, entertainment systems and displays
# Harmonized Program

## Program Overview

### Diagnose and Repair Heating, Ventilation and Air Conditioning (HVAC) and Comfort Control Systems (J)
- Diagnose and repair air flow control and heating systems
  - J1
- Diagnose and repair refrigerant systems
  - J2

### Diagnose and Repair Steering and Suspension, Braking, Control Systems, Tires, Wheels, Hubs and Wheel Bearings (K)
- Diagnose and repair steering and control systems
  - K1
- Diagnose and repair suspension and control systems
  - K2
- Diagnose and repair braking and control systems
  - K3
- Diagnose and repair tires, wheels, hubs and wheel bearings
  - K4

### Diagnose and Repair Restraint Systems, Body Components, Accessories and Trim (L)
- Diagnose and repair restraint systems
  - L1
- Diagnose and repair wind noises, rattles and water leaks
  - L2
- Diagnose and repair interior and exterior components, accessories and trim
  - L3
- Diagnose and repair latches, locks and movable glass
  - L4

### Diagnose and Repair Hybrid and Electric Vehicles (EV) (M)
- Implement specific safety protocols for hybrid and electric vehicles (EV)
  - M1
- Diagnose and repair hybrid and electric vehicle (EV) systems
  - M2

Section 3
PROGRAM CONTENT
Automotive Service Technician
Level 1

Automotive Service Technician
Line (GAC): A PERFORM SAFETY-RELATED FUNCTIONS
Competency: A1 Maintain safe work environment

Objectives
To be competent in this area, the individual must be able to:
• Apply safe work practices.

LEARNING TASKS
1. Describe WorkSafeBC and OHS regulations
   • Rights and responsibilities
     o Right to refuse work
     o Reporting accidents
     o Investigations
   • Personal Protective Equipment (PPE)
2. Describe safe work practices
   • Safe vehicle operation
     o Speed limit
     o Parking on a hoist
     o Road test
   • Clean and organized work area
   • Correct use of tools and equipment
     o Maintenance
     o Function
     o Operation
   • Lockout procedures
   • Flammable, explosion, and electrical hazards
   • Using compressed air
3. Describe fire safety procedures
   • Component and causes of fire
     o Fuel
     o Heat
     o Oxygen
   • Flammability
     o Flash points
   • Types of fires
     o Class A, B, C and D fires
   • Use of fire extinguishers
   • Fire prevention equipment
     o Emergency fire blanket
   • Precautions when working with flammable substances
   • Storage of flammable materials
     o Gasoline
     o Oily rags
LEARNING TASKS
4. Use Workplace Hazardous Materials Information System (WHMIS)

CONTENT
- WHMIS
  - Right to know
  - Worker education
  - Product identification
- Roles and responsibilities
  - Employers
  - Suppliers
  - Workers
- Labelling
  - Symbols
- MSDS
  - Hazards
  - Handling
  - Ingredients
- Storage
Line (GAC): A  PERFORM SAFETY-RELATED FUNCTIONS
Competency: A2  Use personal protective equipment (PPE) and safety equipment

Objectives
To be competent in this area, the individual must be able to:

- Select and use personal protective equipment (PPE).
- Use shop emergency equipment and procedures.

LEARNING TASKS

1. Describe personal safety
   - Personal apparel
   - Personal protective equipment (PPE)
     - Safety glasses
     - Boots
     - Face shield
   - Exhaust extraction
   - Hazard awareness
   - Ergonomic lifting

2. Describe shop emergency equipment and procedures
   - Emergency shutoffs
   - Fire control
   - Eye-wash facilities
   - Spill kit
   - Emergency exits
   - First aid facilities
   - Outside meeting place

Achievement Criteria

Performance  The learner will wear PPE as needed for each task.
Conditions  The learner will be given
   - Access to PPE
Criteria  The learner will be evaluated on
   - PPE selection
   - PPE fit
   - Consistency of usage
**Line (GAC):** B  USE TOOLS, EQUIPMENT AND DOCUMENTATION  
**Competency:** B1  Use tools and equipment

**Objectives**  
To be competent in this area, the individual must be able to:  
- Use tools and equipment.  
- Demonstrate safe use of welding equipment.

**LEARNING TASKS**

| | - Bending, cutting, flaring |
5. Describe accessory drive belts

- Types
  - Serpentine
  - Stretch
  - V-belt

- Inspection and maintenance
- Installation
Line (GAC): B USE TOOLS, EQUIPMENT AND DOCUMENTATION
Competency: B3 Use hoisting and lifting equipment

Objectives
To be competent in this area, the individual must be able to:
• Use hoisting and lifting equipment.

LEARNING TASKS
1. Describe hoisting and lifting safety procedures

2. Use hoisting and lifting equipment

CONTENT
• Capacities
• Operation
• Lock out
• Types of jacks
  o Mechanical
  o Hydraulic
  o Pneumatic
• Types of hoists
  o 2-post
  o 4-post
• Stands
• Engine hoists
• Inspection
• Vehicle lifting points
• Required adapters and extensions
Line (GAC): B USE TOOLS, EQUIPMENT AND DOCUMENTATION
Competency: B4 Use technical information

Objectives
To be competent in this area, the individual must be able to:
• Use technical information.

LEARNING TASKS
1. Describe technical information
   ● Types
     o Electronic
     o Print

2. Use technical information
   ● Navigation
   ● Manufacturer’s specifications
   ● Manufacturer’s recalls
   ● Repair procedures
     o Estimates
     o Technical service bulletins (TSBs)
   ● Safety concerns
   ● Description of operations and parts
   ● Diagrams
Line (GAC): C USE COMMUNICATION AND MENTORING TECHNIQUES
Competency: C1 Use communication techniques

Objectives
To be competent in this area, the individual must be able to:
  • Use communication techniques

LEARNING TASKS
1. Demonstrate two-way communication
   • Verbal and written instructions
   • Record keeping
     o Service/work orders
     o Technical reports
     o Parts requisition

2. Use active listening
   • Attention
   • Open-ended questions
   • Clarification

3. Use digital communication technologies
   • Hand-held devices
HARMONIZED PROGRAM
Program Content
Level 1

Line (GAC): H DIAGNOSE AND REPAIR DRIVELINE SYSTEMS
Competency: H1 Diagnose and repair drive shafts and axles

Objectives
To be competent in this area, the individual must be able to:
• Service drive shafts and axle shafts.

LEARNING TASKS
1. Describe drive shafts
   • Types
     o Front-wheel drive
     o Rear-wheel drive
   • Components
     o Constant velocity (CV) axles
     o Universal joints
     o Mounts and supports
   • Operation
   • Safety
   • Inspection and testing
     o Sensory
     o Run out
     o Working angle
   • Component service
     o Balancing and phasing
     o Joint replacement

2. Service drive shafts

Achievement Criteria
Performance
The learner will assess driveline angle.

Conditions
The learner will be given
• Vehicle
• Tools and equipment
• Access to technical information

Criteria
The learner will be evaluated on
• Safety
• Tool usage
• Procedure
• Accuracy of results
Line (GAC): I  DIAGNOSE AND REPAIR ELECTRICAL SYSTEMS AND COMPONENTS
Competency: I1  Diagnose and repair basic wiring and electrical systems

Objectives
To be competent in this area, the individual must be able to:
• Describe the fundamentals of electrical circuits and components.
• Service and repair wiring.
• Use electrical test equipment.

LEARNING TASKS

1. Describe electrical fundamentals
   • Terminology
   • Theories
     o Ohm’s law
     o Magnetism
     o Watt’s law

2. Describe electrical circuits and components
   • Types of circuits
   • Faults
     o Opens
     o Shorts
     o Grounds
   • Components
     o Switches
     o Circuit protection
     o Relays

3. Read and interpret wiring diagrams
   • Symbols
   • Colours
   • Identification numbers
   • Power flows

4. Service and repair wiring
   • Types of wires
   • Repair methods

5. Use electrical test equipment
   • Types
     o Test lights
     o Power (logic) probes
     o Digital Volt Ohm meter (DVOM)
   • Measuring values
     o Voltage
     o Amperage
     o Resistance
   • Units of measurement
LEARNING TASKS

6. Use scan tools

CONTENT

• Voltage drop
• Types
  o Tools
  o Codes
• On-board diagnostics
• Basic operation

Achievement Criteria

Performance The learner will perform various electrical measurements on circuits.

Conditions The learner will be given
  • A circuit
  • Multi-meter

Criteria The learner will be evaluated on
  • Safety
  • Tool usage
  • Procedures
  • Accuracy of results
HARMONIZED PROGRAM
Program Content
Level 1

Line (GAC): I  DIAGNOSE AND REPAIR ELECTRICAL SYSTEMS AND COMPONENTS

Competency: I2  Diagnose and repair starting and charging systems and batteries

Objectives
To be competent in this area, the individual must be able to:
• Service and test 12-volt batteries.

LEARNING TASKS
1. Describe 12-volt batteries
   • Safety
   • Construction
   • Types
   • Ratings

2. Service 12-volt batteries
   • Inspection
   • Cleaning
   • Maintenance
   • Installation
   • Recycling

3. Test 12-volt batteries
   • Load
   • Conductance
   • Hydrometer
   • Parasitic
   • Interpret test data

4. Charge 12-volt batteries
   • Safety
   • Size, type, rate

Achievement Criteria
Performance  The learner will test a 12-volt battery.
Conditions  The learner will be given
• A 12-volt battery
• Test equipment
Criteria  The learner will be evaluated on
• Safety
• Tool usage
• Procedure
• Accuracy of results
Line (GAC): K

DIAGNOSE AND REPAIR STEERING AND SUSPENSION, BRAKING, CONTROL SYSTEMS, TIRES, WHEELS, HUBS AND WHEEL BEARINGS

Competency: K1 Diagnose and repair steering and control systems

Objectives

To be competent in this area, the individual must be able to:

- Service mechanical and hydraulic steering systems.
- Describe occupant restraint system safety.
- Perform wheel alignment.

LEARNING TASKS

1. Describe steering columns
   - Types
     - Tilt
     - Telescoping
   - Steering wheel lock
   - Combination switch

2. Inspect steering columns
   - Shafts, universal joints, coupling, splines
   - Collapsing function
   - Electrical connections

3. Describe occupant restraints
   - Safety
   - Types
     - Driver
     - Passenger
     - Seat belt pre-tensioner
   - Air bag wiring

4. Remove and replace steering wheel air bag inflator module
   - Safety
     - Disarm
   - Precautions
     - Handling
     - Storage

5. Describe steering linkage
   - Types
     - Parallelogram
     - Cross steer
     - Rack and pinion
   - Linkage
   - Tie rods
6. Inspect steering linkage
   - Tests
     - Road test
     - Steering wheel free play
     - Dry park test
     - Visual inspection

7. Describe conventional steering gears
   - Recirculating ball steering box design
     - Ball nut assembly
     - Sector shaft
     - Thrust bearings
     - Seals
     - Lubrication

8. Service conventional steering gears
   - Seal leakage
   - Shaft wear
   - Adjustments
     - Gear tooth lash
     - Over centre adjustment

9. Describe rack and pinion steering gears
   - Housing and seals
   - Rack and pinion
   - Bearings
   - Tie rod ends
   - Bellows (dust boots)
   - Mounting

10. Service rack and pinion steering gears
    - Tie rod ends
    - Leaks
    - Mounting

11. Describe power steering
    - Fluids
    - Pump
    - Hoses
    - Valves

12. Service power steering
    - Fluid level and condition
      - Leaks
    - Belts
    - Tests
      - Road test
      - Visual inspection
      - Pressure and volume
    - Bleeding procedures
13. Perform wheel alignment
   - Steering geometry
     - Caster, camber, toe
     - Steering axis inclination
     - Thrust angle
   - Pre-checks and road test
   - Alignment procedure
     - Factory adjustments
   - Steering wheel centre check
   - Steering sensor re-calibration

**Achievement Criteria 1**

**Performance** The learner will perform a steering inspection.

**Conditions** The learner will be given
- A vehicle
- Measuring equipment
- Access to technical information

**Criteria** The learner will be evaluated on
- Safety
- Testing procedure
- Accuracy of results

**Achievement Criteria 2**

**Performance** The learner will perform a wheel alignment.

**Conditions** The learner will be given
- A vehicle
- Wheel alignment equipment

**Criteria** The learner will be evaluated on
- Safety
- Procedure
- Tool and equipment usage
- Accuracy of adjustments

**Achievement Criteria 3**

**Performance** The learner will remove and reinstall an air bag inflator module.

**Conditions** The learner will be given
- A vehicle
- Tools
- Access to technical information

**Criteria** The learner will be evaluated on
- Safety

Level 1

Line (GAC): K DIAGNOSE AND REPAIR STEERING AND SUSPENSION, BRAKING, CONTROL SYSTEMS, TIRES, WHEELS, HUBS AND WHEEL BEARINGS

Competency: K2 Diagnose and repair suspension and control systems

Objectives
To be competent in this area, the individual must be able to:
• Inspect and service mechanical suspension systems.

LEARNING TASKS
1. Describe frame designs
   • Unibody
     o Subframe
   • Conventional types
     o Perimeter
     o Ladder
     o Torque boxes
   • Accident crumple zones
   • Construction

2. Describe suspension systems
   • Front
     o Rigid
     o Independent
       - McPherson strut
       - Short and long arm
       - Multi-link
       - Twin I-beam
   • Rear
     o Rigid
     o Independent
       - Chapman strut
       - Short and long arm
       - Multi-link
       - Semi-rigid
   • Dynamics
     o Forces
     o Body roll
   • Faults
3. Describe suspension components

- Springs
  - Purpose
  - Types
    - Coil
    - Leaf
    - Torsion bar
  - Ride height
  - Performance

- Shocks and struts
  - Purpose
  - Components
  - Types
    - Conventional
    - Gas
  - Applications
    - Towing
    - Off road
    - Performance

- Ball joints
  - Loaded
  - Follower

- Anti-sway bar
- Rubber bushings
- Mounting points

4. Inspect and service suspension systems

- Safety
- Visual inspection
- Road test
- Removal and replacement
- Measurements
- Alignment
- Faults
Achievement Criteria

Performance  The learner will identify and inspect suspension systems.

Conditions  The learner will be given
  - A vehicle
  - Measuring equipment
  - Access to technical information

Criteria  The learner will be evaluated on
  - Safety
  - Testing procedure
  - Accuracy of component identifications
  - Accuracy of inspection
Objectives

To be competent in this area, the individual must be able to:
- Service and repair mechanical, hydraulic brake systems.
- Service power assist systems.

LEARNING TASKS

1. Describe hydraulic brake systems
   - Principles
     - Hydraulic
       - Pascal’s law
     - Friction
   - Types
     - Disc
     - Drum
   - Components
     - Cylinders
     - Calipers
     - Valves
   - Faults

2. Service hydraulic brake systems
   - Road test
   - Inspection
   - Adjustment
   - Measurement
   - Machining
   - Replacement
   - Bleeding/exchange
   - Faults

3. Service brake tubing
   - Materials
   - Bending, cutting, flaring
   - Fittings

4. Describe power assist systems
   - Principles
   - Types
     - Vacuum
     - Hydraulic
   - Components
   - Faults
LEARNING TASKS
5. Service power assist systems

CONTENT
- Fluids
- Belts and hoses
- Vacuum
- Replacement
- Adjustment
  - Brake pedal free play
- Tests
  - Function test
  - Pressure test
  - Vacuum test
- Faults

Achievement Criteria

Performance
The learner will inspect front disc brakes.

Conditions
The learner will be given
- A vehicle
- Measuring equipment
- Access to technical information

Criteria
The learner will be evaluated on
- Safety
- Tool usage
- Accuracy of inspection
- Accuracy and interpretation of measurements
HARMONIZED PROGRAM
Program Content
Level 1

Line (GAC): K DIAGNOSE AND REPAIR STEERING AND SUSPENSION, BRAKING, CONTROL SYSTEMS, TIRES, WHEELS, HUBS AND WHEEL BEARINGS

Competency: K4 Diagnose and repair tires, wheels, hubs and wheel bearings

Objectives
To be competent in this area, the individual must be able to:
• Service and repair tires and wheels.
• Service and repair hubs and bearings.

LEARNING TASKS

1. Describe tire construction
   • Side wall markings
   • Ratings
   • Tread design
   • Run flat design

2. Service tires
   • Inspection
     o Wear patterns
     o Damage
   • Rotation
   • Mounting and balancing
   • Repair
   • Types
   • Offset
   • Sizing
   • Wheel fasteners

3. Describe wheels
   • Types
   • Offset
   • Sizing
   • Wheel fasteners

4. Inspect wheels
   • Curb damage
   • Run out

5. Describe Tire Pressure Monitoring System (TPMS)
   • Types
     o Direct
     o Indirect
   • Sensor replacement
   • System service
     o Reset
     o Reprogram
     o Calibrate

6. Describe wheel bearings
   • Types
     o Ball
     o Tapered roller
     o Sealed
   • Components
LEARNING TASKS

7. Service wheel bearings

8. Describe spindles and hubs

9. Service spindles and hubs

CONTENT

- Loading principles
- Removal and installation techniques
- Lubrication
- Axial and radial play
- Adjustment

- Front-wheel drive
- Rear-wheel drive
- Bearing types
- Lubrication
- Inspection
  - Sensory
  - Measurements
- Bearing adjustment
- Removal and installation

Achievement Criteria

Performance The learner will mount and balance a tire.

Conditions The learner will be given
- A vehicle
- Tire mounting and balancing equipment

Criteria The learner will be evaluated on
- Safety
- Equipment usage
- Procedure
- Accuracy of balance
Line (GAC): L DIAGNOSE AND REPAIR RESTRAINT SYSTEMS, BODY COMPONENTS, ACCESSORIES AND TRIM

Competency: L2 Diagnose and repair wind noises, rattles and water leaks

Objectives
To be competent in this area, the individual must be able to:
• Identify common areas of concern for wind noise, rattles and water leaks.

LEARNING TASKS
1. Describe wind noise, rattles and water leaks

CONTENT
• Diagnostic tools
  o Smoke machine
  o Chassis ears
  o Water hose
Line (GAC): L  
DIAGNOSE AND REPAIR RESTRAINT SYSTEMS, BODY COMPONENTS, ACCESSORIES AND TRIM

Competency: L3  
Diagnose and repair interior and exterior components, accessories and trim

Objectives
To be competent in this area, the individual must be able to:
• Repair interior and exterior components and trim.

LEARNING TASKS

1. Describe interior and exterior body components and trim
   - Exterior components
     o Mirrors
     o Roof rack
   - Interior components
     o Seats
     o Dashboard
   - Accessories
     o Running boards
     o Bug shield

2. Repair interior and exterior components and trim
   - Repair parts and materials
     o Adhesives
     o Gaskets
     o Sealants
     o Fastening devices
   - Tools
     o Trim tools
     o Hand tools
   - Remove, replace and adjust
   - Verify fit, function and performance
Line (GAC): L

DIAGNOSE AND REPAIR RESTRAINT SYSTEMS, BODY COMPONENTS, ACCESSORIES AND TRIM

Competency: L4 Diagnose and repair latches, locks and movable glass

Objectives
To be competent in this area, the individual must be able to:
• Describe latches, locks and movable glass.

LEARNING TASKS
1. Describe latches, locks and movable glass.

CONTENT
• Components
  o Lock
  o Rod
  o Cable
  o Regulator
  o Sensor/switches
HARMONIZED PROGRAM
Program Content
Level 1

Line (GAC): M
DIAGNOSE AND REPAIR HYBRID AND ELECTRIC VEHICLES (EV)

Competency: M1 Implement specific safety protocols for hybrid and electric vehicles (EV)

Objectives
To be competent in this area, the individual must be able to:

- Describe hybrid and electric vehicle safety.

LEARNING TASKS

1. Identify high voltage components
   - High voltage battery
   - Inverter
   - Motor/generator
   - Wiring

2. Describe hybrid and electric vehicle safety
   - Safety
     - Shop set up
       - Cones
       - Caution signs
     - Precautions
       - Pushing/ towing
       - Auto start
   - Personal protective equipment (PPE)
     - Gloves
   - High voltage disconnect procedures
     - High voltage contactor
     - Shut-down service plug
Section 4

TRAINING PROVIDER STANDARDS
Facility Requirements

Classroom Area
- Comfortable seating and tables suitable for training, teaching, lecturing
- Compliance with all local and national fire code and occupational safety requirements
- Lighting controls to allow easy visibility of projection screen allowing students to take notes
- Windows must have shades or blinds to adjust sunlight
- Heating/air conditioning for comfort all year round
- In-room temperature regulation and ventilation to ensure comfortable room temperature
- Acoustics in the room must allow the instructor to be heard
- White marking board with pens and eraser (optional: flipchart in similar size)
- Projection screen or projection area at front of classroom
- Overhead projector and/or multi-media projector

Shop Area
- Compliance with all local and national fire code and occupational safety requirements
- Ventilation and vehicle exhaust extraction as per WorkSafeBC Standards
- Compliance with Municipal and Provincial bylaws
- Ceiling shall be a minimum height of 16’ or as varied by good engineering practices and code
- Appropriate lifting devices (hoists) used in industry
- Adequate hoist to student ratio
- Suitable demonstration area
- Lighting appropriate for good vision in ambient light
- Refuse and recycling bins for used shop materials
- First-aid facilities
- Computer terminals

Lab Requirements
- This section does not apply.

Student Facilities
- Adequate lunch room as per WorkSafeBC requirements
- Adequate washroom facilities as per WorkSafeBC requirements
- Personal storage lockers

Instructor’s Office Space
- Desk and filing space
- Computer
Other

- WiFi
Tools and Equipment: Common to All Levels

**Required Shop Equipment**

- Acetylene torches
- Air compressor – hoses – inline filter and water separators
- Battery charger/boosting equipment
- Bench grinders
- Bench vises
- Bottle jacks (2)
- Brake pedal depressor
- Computer stations or terminals
- Drill press
- Floor jack
- Grease gun and fluid suction pump
- Heat gun
- High voltage safety gloves (0 rated 1000v)
- Hydraulic press
- Infrared thermometer
- Jack stands and supports
- Oil drain barrels and disposal system
- Parts washers
- Seal drivers and extractors
- Spreaders (tire)
- Smoke machine
- Spring compressors – coil spring and strut
- Tire balancer equipment (road-force type recommended)
- Tire changing machine (preferred run-flat capable)
- Tire repair equipment
- TPMS system service tools
- Vehicle lifts
- Vehicle service information system
- Water hose
- Welding equipment – GMAW welder and oxy fuelled
- Work benches

**Required Electronic Service Equipment**

- Lab scope – 4-8 per class of 16 (2-channel, digital, cursor function with time capture capability)
- Lab scope accessories (shielded cables and back probes)
- Logic (power) probe
- Low amp probe
- Scan tools (various factory and generic)

**Required Shop (Facility) Tools**

- Air drills/tools
- Air hammer/chisel
- Air ratchet
- Antifreeze tester
- Blow gun
- Bolt extractor set (easy outs)
- Centre punch
- Chisels, punches
- Creeper/fender covers
- Crowfoot wrenches (flare and std, SAE and metric)
- Drill and bits
- Drill gauge
- Feeler gauges – SAE and metric
- Files – bastard cut/half round/mill cut/square and thread file
- Filter wrenches
- Flare nut wrenches – SAE and metric
- Flash lights
HARMONIZED PROGRAM
Program Content
Section 4

- Hacksaw
- Hammers – ball peen/dead blow/rubber
- Hex keys – SAE and metric
- Impact driver and bits
- Impact wrench and impact socket set – SAE and metric
- Inspection mirror
- Jumper lead
- Magnetic pick up tool
- Mallet/soft face
- Mechanic’s pick set
- Pliers – slip joint, needle nose, adjustable, wheel weight, side cutter, snap ring, locking, hog ring and battery types
- Pry bar
- Ratchet and sockets – 1/4, 3/8 and 1/2 drive – SAE and metric, swivel, spark plug, extensions and adapters
- Scraper (gasket and carbon)
- Screwdriver set
- Steel rule
- Stethoscope
- Straight edge
- Stud extractor
- Tap and die set – SAE and metric
- Tap extractor
- Tape and ruler
- Thread files
- Thread pitch gauge
- Tin snips – centre, left and right cut
- Tire pressure gauge
- Tool box
- Torque wrenches – 3/8 and 1/2
- Vise grips
- Wire brush
- Wire stripper/crimping tool
- Wrench set – SAE and metric/various designs

Student Tools and Equipment

During attendance and completion of the technical training sessions, apprentices may be responsible for having specific equipment and tools. If equipment and tools are required, a list will be given to each apprentice at the beginning of the technical training session.
Tools and Equipment: Level 1 (and Foundation)

Required Shop Equipment

- Air buffer
- Airbag removal tools
- Airbag simulators
- Alignment lift and equipment- 4 wheel
- Angle grinder
- Arbor press
- Axle boot clamp tool
- Ball joint press and adapters
- Battery hydrometer
- Battery tester (electronic)
- Battery tester/alternator and starter tester (AVR)
- Bearing remover
- Belt tension gauge
- Brake adjustment calipers
- Brake bleeder wrenches
- Brake cylinder hone
- Brake drum gauge (for brake shoe adjusting)
- Brake drum micrometer
- Brake fluid moisture tester
- Brake lathe
- Brake pressure tester
- Brake rotor gauge/micrometer
- Brake system bleeder
- Brake washer system (for 2 and 4 post hoists)
- Caliper tools for rear-wheel disc
- Chassis ears
- Dial indicator set (flare and std, SAE and metric)
- Door trim tools
- Electrical short detector
- Flaring tool (SAE, metric and ISO)
- Heli-coil kits
- Hub service kit
- Leak detection tank (tires)
- Pickle-fork tool set
- Pitman arm pullers
- Power-steering pressure tester
- Pullers – gear, pulley and steering wheel
- Rivet gun
- Slide hammer
- Smoke machine
- Steering wheel holder
- Steering wheel puller set
- Stretch belt removal and installation tool
- Tie-rod end puller
- Tie-rod sleeve tools
- Transmission fixtures
- Tube bending tool
- Tube cutters
- U-joint press
- Upholstery tools – trim panel tools
- Vacuum gauge
- Wheel stud installer
Required Shop (Facility) Tools

- Battery post service and reshape tool
- Belt tension release tool
- Brake bleeder wrenches
- Brake service tools (adjusters, spring removal, installation and caliper tools)
- Die grinder
- Multi-meter (DVOM)
- Nut driver set – SAE and metric
- Soldering tools
- Standard test leads and probes
- Tamper-proof torx set
- Terminal remover tools
- Test lamp – electronics safe (powered and non-powered)
- Torque angle meter/indicator
- Torx bits
- Tread depth gauge (for tires and brakes)
- Trouble light
- Utility knife
- Vacuum pump/gauge
- Vernier caliper – SAE and metric

Line: 1 EMPLOYABILITY SKILLS
Competency: 1.1 Demonstrate employment readiness skills

Objectives
The learner will be able to demonstrate the skills required to obtain and retain employment

LEARNING TASKS
1. Describe the responsibilities of employees and expectations employers have of employees

CONTENT
- Communication
  - Use of trade language
  - Reading and comprehending
  - Writing

- Thinking
  - Problem solving and decision making
  - Use of mathematics
  - Use of current technology
  - Ability to research

- Desire to continue learning

- Positive attitude
  - Self esteem
  - Confidence
  - Honesty and integrity
  - Initiative
  - Energy
  - Persistence
  - Cooperative

- Responsibility
  - Dependability
  - Goal and priority setting
  - Time management
  - Money management
  - Punctuality
HARMONIZED PROGRAM OUTLINE
Appendices

- Adaptability
  - Positive attitude towards change
  - Respect for other diversity and differences
  - Creativity
  - Flexible
- Team skills
  - Work with others
  - Group planning
  - Respect for others thoughts and opinions
  - Leadership when appropriate
  - Ability to handle conflict
  - Self control
- Care for quality
- Personal care
  - Clean
  - Neat
  - Dress appropriately
  - Rested
  - No substance abuse
- Following safety regulations

2. Describe responsibilities of employers and expectations employees have of employers

- Respect
- Trust
- Fairness
- Care
- Concern
- Feelings
- Safe work site
- Timely payment

3. Describe responsibilities employees have to customers

- Vehicle protection precautions
  - Smoking
  - Fender covers
  - Road testing
- Privacy
4. Prepare a resume

- Gathering information
  - Goals
  - Skills
  - Education
    - Dates
  - Experience
    - Dates
    - Relationships and responsibilities
  - Activities
  - References
- Statements of accomplishment
  - Challenge
  - Action
    - Skills applied
  - Results
- Types of resumes
  - Chronological
  - Functional
  - Generic
  - Specific

5. Prepare a letter of introduction

- Not to exceed one page
- Highlight important accomplishments in same order as they appear in the job posting

6. Identify job search resources

- Newspapers
- Internet
- Networking
- Industry publications
- Direct approach

7. Prepare for an interview

- Research of the organization
- Review of job qualifications
- Prepare for broad personal questions
- Review of resume
- Interview practice
- Arriving ahead of time
- Appropriate dress

Achievement Criteria:

Given a written and/or a practical assessment on Employment Readiness Skills the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
### TOOLS AND EQUIPMENT

#### Competency: 2.1 Use diagnostic equipment

**Objectives**
- The learner will be able to demonstrate the use of diagnostic equipment
- The learner will be able to interpret diagnostic information

#### LEARNING TASKS

**Achievement Criteria**

Given a written and/or a practical assessment on Diagnostic Equipment, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor
assessment.
Line: 3  GENERAL AUTOMOTIVE MAINTENANCE
Competency: 3.1 Perform cooling system maintenance

Objectives
- The learner will be able to describe cooling system components and fluids
- The learner will be able to inspect cooling system condition and perform routine cooling system maintenance

LEARNING TASKS

1. Describe engine coolants
   - Ethylene glycol-based antifreeze
   - Propylene glycol-based antifreeze
   - Phosphate-free ethylene-glycol based antifreeze
   - Organic acid technology (OAT)
   - Hybrid organic acid technology (HOAT)
   - Chemical treatments and additives
   - Antifreeze / water proportions
   - Recycling

2. Describe basic cooling system operation
   - Air cooled
   - Liquid cooled open-system
   - Liquid cooled closed system

3. Describe and identify cooling system components
   - Radiator
   - Hoses
   - Clamps
   - Water pump
   - Thermostat
   - Heater core
   - Pressure cap
   - Expansion tank
   - Engine coolant passages
   - Cooling fans
   - Temperature sensors and indicators

4. Test engine coolant
   - Hydrometer
   - Refractometer
   - pH strips
   - Electrolysis inspection
   - Combustion gases
5. Maintain cooling systems

- Leak inspection and diagnosis
- Drain and refill cooling system
- Bleed cooling system
- Flush cooling system
- Test thermostat
- Replace thermostat

**Achievement Criteria:**

Given a written and/or a practical assessment on Cooling System Maintenance, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
Line: 3
Competency: 3.2 Perform exhaust system maintenance

Objectives
- The learner will be able to identify exhaust system components
- The learner will be able to diagnose exhaust systems
- The learner will be able to perform exhaust system maintenance

LEARNING TASKS
1. Identify exhaust system components
   - Manifold and headers
   - Catalytic converter
   - Muffler and resonator
   - Piping and hardware
2. Describe the design and operation of exhaust systems
   - Manifold and headers
   - Catalytic converter
   - Muffler and resonator
   - Piping and hardware
3. Inspect and repair exhaust systems
   - Inspection
     - Visual
     - Audible
     - Smoke machine
   - Thread repair
   - Component removal
   - Cutting procedures
   - Component installation

Achievement Criteria:
Given a written and/or a practical assessment on Exhaust System Maintenance, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
Line: 3 GENERAL AUTOMOTIVE MAINTENANCE
Competency: 3.3 Perform transmission maintenance

Objectives
- The learner will be able to perform maintenance operations on manual transmissions and transaxles
- The learner will be able to perform maintenance operations on automatic transmissions and transaxles

LEARNING TASKS

1. Describe and identify transmission fluids
   - Gear oil
   - Engine oil
   - Manufacturer’s specific manual transmission fluids
   - Manufacturer’s specific automatic transmission fluids

2. Maintain manual transmissions and transaxles
   - Fluid level inspection
   - Fluid selection
   - Leak diagnosis
   - Drain and refill
   - Linkage adjustment

3. Maintain automatic transmissions and transaxles
   - Fluid level inspection
   - Fluid selection
   - Leak diagnosis
   - Drain and refill
   - Replace pan gasket and filter
   - Flush transmission fluid
   - Inspect shift linkage
   - Inspect throttle valve cable or linkage
   - Extract diagnostic codes using a scan tool

Achievement Criteria:
Given a written and/or a practical assessment on Transmission Maintenance, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
Line:  4  GENERAL AUTOMOTIVE PRACTICES
Competency:  4.1  Assess leaks

Objectives

- The learner will be able to locate leaks and determine causes and solutions

LEARNING TASKS

1. Describe leak detection methods
   - Visual
   - Audible
   - Black light
   - Fluid analysis
   - Pressurization / vacuum
   - Smoke generator

2. Assess leak relevance
   - Cost of repair
   - Potential damage

Achievement Criteria:

Given a written and/or a practical assessment on Assessing Leaks, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
Line: 4 GENERAL AUTOMOTIVE PRACTICES
Competency: 4.2 Service gaskets and seals

Objectives
- The learner will be able to identify causes of gasket and seal failure
- The learner will be able to select gaskets and seals
- The learner will be able to remove and replace gaskets and seals

LEARNING TASKS

1. Describe gasket and seal construction
   - Gasket
     - Cylinder head gaskets
     - Other gaskets
       - Rubber
       - Non-rubber
       - Reusable
       - Forms in place
   - Sealers
     - Aerobic
     - Anaerobic
     - Sensor safe
   - Seals
     - O-rings
     - Lip seals
   - Sealing washers

2. Diagnose cause of failure
   - Incorrect assembly
   - Excessive heat
   - Over pressurization
   - Lack of lubrication
   - Seal deterioration
   - Mating surface damage

3. Service gaskets and seals
   - Removal techniques
   - Surface preparation
   - Installation techniques
   - Torque sequence

Achievement Criteria:
Given a written and/or a practical assessment on Gasket and Seal Service, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
## GENERAL AUTOMOTIVE PRACTICES

### Competency: 4.3 Describe fuel delivery systems

#### Objectives
- The learner will be able to identify fuel delivery system components
- The learner will be able to describe the design and operation of fuel delivery systems

#### LEARNING TASKS

<table>
<thead>
<tr>
<th>Task Description</th>
<th>CONTENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Identify components of fuel delivery systems</td>
<td>- Fuel tank</td>

| 2. Describe the design and operation of fuel delivery systems | - Fuel tank                                                             |
|                                                             | - Filler neck and cap                                                  |
|                                                             | - Roll-over valves                                                     |
|                                                             | - Fuel pumps and regulators                                            |
|                                                             | - Filters and strainers                                                |
|                                                             | - Fuel heaters                                                         |
|                                                             | - Water separators                                                     |
|                                                             | - Vapour recovery                                                      |
|                                                             | - Sensors and gauges                                                   |
|                                                             | - Construction materials                                               |
|                                                             | - Associated lines and fittings                                        |

#### Achievement Criteria:
Given a written and/or a practical assessment on Fuel Delivery Systems, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
Line:  4  GENERAL AUTOMOTIVE PRACTICES
Competency:  4.4  Describe internal combustion engine principles

Objectives
- The learner will be able to identify internal combustion engine components
- The learner will be able to describe the design and operation of internal combustion engines

LEARNING TASKS
1. Describe internal combustion engine components
   - Short block assembly
   - Cylinder head assembly
   - Associated parts and fasteners

2. Describe the design and operation of internal combustion engines
   - Fuel types
   - Two and four stroke cycle
   - Construction design and materials
   - Engine configurations
   - Cooling medium
   - Lubrication
   - Design variations
     - Miller cycle
     - Wankel
     - Variable valve timing

Achievement Criteria:
Given a written and/or a practical assessment on Internal Engine Combustion Principles, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
GENERAL AUTOMOTIVE PRACTICES

Objectives
- The learner will be able to describe the principles of combustion
- The learner will be able to describe the byproducts of combustion
- The learner will be able to describe effects of byproducts of combustion on the environment

LEARNING TASKS

1. Describe the combustion process
   - Products of complete combustion
   - Products of incomplete combustion

2. Describe causes of harmful vehicle emissions
   - Oxides of nitrogen
   - Hydrocarbons
   - Carbon monoxide
   - Carbon dioxide
   - Oxides of sulphur
   - Particulates

3. Describe the effects of products of combustion on the environment
   - Oxides of nitrogen
   - Hydrocarbons
   - Carbon monoxide
   - Carbon dioxide
   - Oxides of sulphur
   - Particulates

Achievement Criteria:
Given a written and/or a practical assessment on Vehicle Emissions, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
Line: 5  STEERING SYSTEMS
Competency: 5.1 Describe four wheel steering systems

Objectives
- The learner will be able to identify four-wheel steering system components
- The learner will be able to describe the operation of four-wheel steering systems

LEARNING TASKS

1. Describe the design and operation of four-wheel steering systems

CONTENT
- Overview
  - Electrical systems
  - Mechanical systems

Achievement Criteria:
Given a written and/or a practical assessment on Four Wheel Steering Systems, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
Line: 6
Competency: 6.1 Describe engine management systems

Objectives
- The learner will be able to describe the function of engine management systems
- The learner will be able to identify the components of engine management systems

LEARNING TASKS
1. Describe the purpose of engine management systems
   - Monitoring and controlling
     - Emissions
     - Fuel economy
     - Driveability
     - Warranty date collection
     - Troubleshooting

2. Identify onboard diagnostic systems
   - OBD
   - OBD II

3. Identify the components of engine management systems
   - Microprocessor
   - Software
   - Inputs
   - Outputs
   - Wiring and connectors
   - Diagnostic connections

Achievement Criteria:
Given a written and/or a practical assessment on Engine Management Systems, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
Objectives

- The learner will be able to identify ignition system components
- The learner will be able to describe the design and operation of electronic ignition systems

**LEARNING TASKS**

<table>

| 2. Describe the design and operation of electronic ignition systems  | - Purpose of ignition system                                           |
|                                                                      | - Primary and secondary circuit                                         |
|                                                                      | - Waste spark                                                          |
|                                                                      | - Variable / fixed dwell systems                                       |
|                                                                      | - Timing                                                               |
|                                                                      | - Ignition switch and wiring                                           |
|                                                                      | - Trigger device(s)                                                   |
|                                                                      | - Sensors                                                              |
|                                                                      | - Computer                                                             |
|                                                                      | - Distributor type                                                     |
|                                                                      | - Distributor-less (direct)                                            |
|                                                                      | - Ignition coil(s)                                                     |
|                                                                      | - High tension wires                                                   |
|                                                                      | - Spark plugs                                                          |

**Achievement Criteria:**

Given a written and/or a practical assessment on Ignition Systems, the Learner will be able to demonstrate knowledge of the trade by achieving 70% or better based on a summative total of Instructor assessment.
APPENDIX B

Glossary
### Appendix B: Glossary

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accessories</td>
<td>Features that are not originally equipped by the manufacturer</td>
</tr>
<tr>
<td>Adjustment</td>
<td>A minor change so that something works better, such as changing park position of a wiper.</td>
</tr>
<tr>
<td>CAN</td>
<td>Controller area network; a protocol for communication between electronic/computer modules.</td>
</tr>
<tr>
<td>Describe</td>
<td>To explain or give an account of an item or concept. This means an introduction to a topic</td>
</tr>
<tr>
<td></td>
<td>area that will include terminology, safety as it pertains to the topic, types and uses of</td>
</tr>
<tr>
<td></td>
<td>the item. For example, describing steering columns will include types, such as tilt and</td>
</tr>
<tr>
<td></td>
<td>telescoping, steering wheel locks and combination switches.</td>
</tr>
<tr>
<td>DVOM</td>
<td>Digital voltage ohmmeter; meter for measuring voltage, amperage, resistance (ohms) and is</td>
</tr>
<tr>
<td></td>
<td>digital in its operation.</td>
</tr>
<tr>
<td>Identify</td>
<td>Establish or indicate what something is. This is the most basic level of learning and</td>
</tr>
<tr>
<td></td>
<td>typically precedes all others, including describing. In the case of a lengthy learning period</td>
</tr>
<tr>
<td></td>
<td>(such as an apprenticeship), it is often adequate to identify a tool or procedure well in</td>
</tr>
<tr>
<td></td>
<td>advance of actually describing and using the tool.</td>
</tr>
<tr>
<td>Interpret</td>
<td>To explain or understand the meaning of something. This primarily refers to using wiring</td>
</tr>
<tr>
<td></td>
<td>diagrams and data.</td>

Appendix C: Previous Contributors

The Program Outline was prepared with the advice and direction of an industry steering committee convened initially by the Automotive Training Standards Organization (ATSO). Members include:

- Jeff Summers  Automotive Service Technician
- Loi Truong  Automotive Service Technician
- Matthew Wilkie  Automotive Service Technician

Subject Matter Experts retained to assist in the development of the Program Outline content:

- Corey Bransfield  Instructor, Okanagan College
- Dean Cadieux  Instructor, Vancouver Island University
- Jeff Hoff  Manager, Napa Autopro, Prince George
- Russ Hunter  Instructor, BC Institute of Technology
- Jeff Summers  Automotive Service Technician
- Loi Truong  Automotive Service Technician
- Matthew Wilkie  Automotive Service Technician
- Brian Yanda  Service Manager, Harris Mazda and Instructor, Malaspina College
