# **INTRODUCTION**

# **Locksmith**

## Foreword

This revised Locksmith Program Outline is intended as a guide for apprentices and employers of apprentices as well as for the use of industry organizations, regulatory bodies, and Provincial and Federal Governments. It reflects updated standards based on the new Locksmith National Occupational Analysis (2006) and British Columbia industry and instructor Subject Matter Experts (SMEs).

Safe working practices, even though not always specified in each operation or topic, are an implied part of the program and should be stressed throughout the apprenticeship.

This Program Outline includes a list of recommended reference textbooks that are available to support the learning objectives.

The Program Outline was prepared with the advice and assistance of the Locksmith Review Committee and will form the basis for further updating of the British Columbia Locksmith Program and learning resources by the Construction Industry Training Organization on behalf of the Industry Training Authority.

Each competency is to be evaluated through the use of written examination in which the learner must achieve a minimum of 70% in order to receive a passing grade. The types of questions used on these exams must reflect the cognitive level indicated by the learning objectives and the learning tasks listed in the related competencies.

### **SAFETY ADVISORY**

Be advised that references to the WorkSafe BC safety regulations contained within these materials do not/may not reflect the most recent Occupational Health and Safety Regulation (the current Standards and Regulation in BC can be obtained on the following website: <http://www.worksafebc.com>. Please note that it is always the responsibility of any person using these materials to inform him/herself about the Occupational Health and Safety Regulation pertaining to his/her work.

## Acknowledgements

This Program Outline was prepared with the advice and direction of an industry steering committee convened initially by the BC Construction Industry Training Organization (CITO). Members include:

- Bill Beazley
- Jim Broughton
- Shawn Carter
- Mark Daigle
- Michael P. Hines
- Kevin Jewell
- Ron McLennan
- Alan Pantinga
- Mitchell Verigen

Industry Subject Matter Experts retained to assist in the development of Program Outline content:

- Bill Beazley
- Jim Broughton
- Shawn Carter
- Michael P. Hines
- Kevin Jewell
- Mitchell Verigen

The Industry Training Authority would like to acknowledge the dedication and hard work of all the industry representatives appointed to identify the training requirements of the Locksmith occupation.

## How to Use this Document

This Program Outline has been developed for the use of individuals from several different audiences. The table below describes how each section can be used by each intended audience.

Section	Employers/ Sponsors	Apprentices	Challengers
<b>Program Credentialing Model</b>	Understand the length and structure of the program	Understand the length and structure of the program, and pathway to completion	Understand challenger pathway to Certificate of Qualification
<b>Program Assessment</b>	Understand the various assessment requirements for the program	Understand the various assessment requirements for the program	Understand the assessment requirements they would have to fulfill in order to challenge the program
<b>OAC</b>	Understand the competencies that an apprentice is expected to demonstrate in order to achieve certification	View the competencies they will achieve as a result of program completion	Understand the competencies they must demonstrate in order to challenge the program
<b>Training Topics and Suggested Time Allocation</b>	Understand the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application	Understand the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application	Understand the relative weightings of various competencies of the occupation on which assessment is based
<b>Program Content</b>	Identifies detailed program content and performance expectations for competencies with a practical component; may be used as a checklist prior to signing a recommendation for certification (RFC) for an apprentice	Provides detailed information on program content and performance expectations for demonstrating competency	Allows individual to check program content areas against their own knowledge and performance expectations against their own skill levels

# **Section 2**

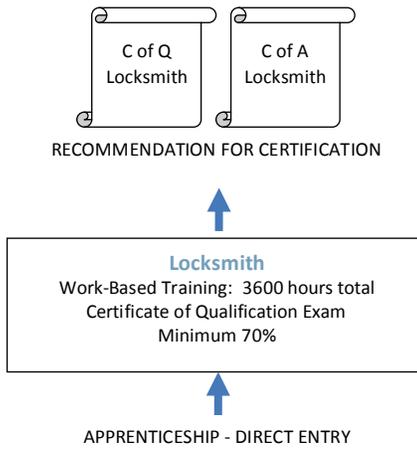

# **PROGRAM OVERVIEW**

## **Locksmith**

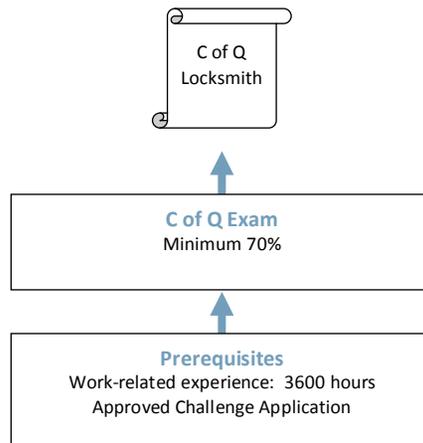

## Program Credentialing Model

**Occupation Name:** Locksmith  
**Model Type:** Single Track  
**Pathway:** Apprenticeship

**Occupation Name:** Locksmith  
**Pathway:** Challenger

## Program Assessment

Apprentices will be assessed fairly and accurately throughout the program on the various skills required to be a professional Locksmith. Assessment activities are designed to provide feedback and allow for further development of skills that have been identified as essential for on the job performance.

The forms of assessment used in this program are described below.

Completion Requirement	Evidence of Achievement	Level of Achievement Required
Work-based training hours	Work-based training report completed by Sponsor or Employer	3600 hours completed
Provincial Exam	ITA-administered exam	Minimum 70%
Recommendation for Certification	Approval or sign-off by Sponsor, Employer, or other individual with sign-off authority	Declared competent

## Occupational Analysis Chart

### LOCKSMITH

**Occupation Description:** “Locksmith” means a person who repairs, services and/or installs all types of keys, locks, access/egress control systems (mechanical or electrical), and builders of hardware in accordance with the provisions of the Ministry of Public Safety & Solicitor General, Security Programs Division, Policing & Community Safety Branch, Private Investigators and Security Agencies Act.

<b>USE SAFE WORK PRACTICES</b> <b>A</b>	Demonstrate workplace safety W A1	Use WHMIS W A2	Practice fire prevention W A3			
<b>ORGANIZE WORK</b> <b>B</b>	Explain the locksmith trade W B1	Interpret blueprints W B2	Apply codes and regulations W B3	Perform material handling W B4	Perform customer sales and services W B5	Perform security consultation W B6
<b>USE TOOLS AND EQUIPMENT</b> <b>C</b>	Use hand tools W C1	Use power tools W C2	Use key-cutting equipment W C3	Describe welding W C4		
<b>CREATE KEYS</b> <b>D</b>	Duplicate keys W D1	Originate keys W D2				
<b>INSTALL AND SERVICE LOCKS</b> <b>E</b>	Install, repair and service locks W E1	Open secured entry W E2	Install and service high security hardware W E3	Service automotive locks W E4	Install and service safes, vaults and safe deposit boxes W E5	

## Program Overview

<b>INSTALL HARDWARE</b> <b>F</b>	Repair doors and frames W F1	Install door closers W F2	Install panic hardware W F3	Service other hardware W F4
	<b>INSTALL ELECTRICAL AND ELECTRONIC COMPONENTS AND HARDWARE</b> <b>G</b>	Describe electrical and electronic theory W G1	Install access controls W G2	Repair and install electrical and electronic hardware W G3
<b>DEVELOP MASTER KEY SYSTEMS</b> <b>H</b>	Plan master key systems W H1	Generate bitting list and pinning charts W H2	Master key cylinders W H3	Maintain accurate records W H4

W = Knowledge or skills are primarily acquired in the workplace  
 EN = Endorsement  
 EL = Elective

## Training Topics and Suggested Time Allocation

### LOCKSMITH

		% of Time	% of Time Allocated to:		
			Theory	Practical	Total
<b>Line A</b>	<b>USE SAFE WORK PRACTICES</b>	<b>3%</b>			<b>100%</b>
A1	Demonstrate workplace safety		50	✓	
A2	Use WHMIS		25	✓	
A3	Practice fire prevention		25	✓	
<b>Line B</b>	<b>ORGANIZE WORK</b>	<b>8%</b>			<b>100%</b>
B1	Explain the locksmith trade		18		
B2	Interpret blueprints		12	✓	
B3	Apply codes and regulations		25	✓	
B4	Perform material handling		12	✓	
B5	Perform customer sales and services		18	✓	
B6	Perform security consultation		15	✓	
<b>Line C</b>	<b>USE TOOLS AND EQUIPMENT</b>	<b>8%</b>			<b>100%</b>
C1	Use hand tools		20	✓	
C2	Use power tools		30	✓	
C3	Use key-cutting equipment		40	✓	
C4	Describe welding		10		
<b>Line D</b>	<b>CREATE KEYS</b>	<b>10%</b>			<b>100%</b>
D1	Duplicate keys		40	✓	
D2	Originate keys		60	✓	
<b>Line E</b>	<b>INSTALL AND SERVICE LOCKS</b>	<b>27%</b>			<b>100%</b>
E1	Install, repair and service locks		25	✓	
E2	Open secured entry		20	✓

H3	Master key cylinders	30	✓	
H4	Maintain accurate records	10	✓	
<b>Total Percentage for Locksmith</b>		<b>100%</b>		

# **Section 3**

# **PROGRAM CONTENT**

# **Locksmith**

**Line (GAC):**            **A    USE SAFE WORK PRACTICES**  
**Competency:**         **A1    Demonstrate workplace safety**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe the application of the Occupational Health and Safety Regulations and know how to find requirements applicable to the Locksmith trade.
- Use personal protective equipment and explain proper maintenance and storage techniques.
- Explain electrical safety regulations as they apply to the Locksmith trade.
- Apply work practices to reduce risk of electrical injury.

**LEARNING TASKS**

**CONTENT**

- |   |  |
|---|--|
| <p>1. Interpret WorkSafeBC Regulations</p>          | <ul style="list-style-type: none"> <li>• Terms used in the Occupational Health and Safety Regulations</li> <li>• Accident reporting</li> <li>• Housekeeping</li> <li>• Material storage</li> <li>• Ladders</li> <li>• WHMIS</li> <li>• Personal protective equipment (PPE)</li> <li>• Lockout/tag-out procedures</li> <li>• Ventilation requirements</li> </ul>        |
| <p>2. Use personal protective equipment (PPE)</p>   | <ul style="list-style-type: none"> <li>• Types <ul style="list-style-type: none"> <li>○ Eye protection/face shield</li> <li>○ Hearing protection, regular hearing tests</li> <li>○ Hand protection</li> <li>○ Head protection</li> <li>○ Foot protection</li> <li>○ Clothing (safety vest, coveralls)</li> </ul> </li> <li>• Maintenance</li> <li>• Storage</li> </ul> |
| <p>3. Identify lifting risks and considerations</p> | <ul style="list-style-type: none"> <li>• Lifting techniques</li> <li>• Limitations</li> <li>• PPE</li> </ul>   |
| <p>4. Identify the risks of repetitive motion</p>   | <ul style="list-style-type: none"> <li>• Repetitive motion <ul style="list-style-type: none"> <li>○ Hand</li> <li>○ Arm</li> <li>○ Back</li> </ul> </li> </ul>   |

**LEARNING TASKS**

5. Work safely with electricity

6. Lab entry

**CONTENT**

- Electrical safety practices
- WorkSafeBC provisions for electrical safety
- Voltage limitations
- Electrical shock
- Effect of electricity on the human body
- Ways to reduce the risk of electrical injury
- Lockout procedure
- De-energize circuit
- Lockout circuit
- Lockout methods
  - Locks
  - Tags
  - Cables
- Key-box system
- Verify circuit de-energized
- Identification before entry
  - Asbestos
  - Mold
  - HAZMAT

**Line (GAC):**            **A    USE SAFE WORK PRACTICES**  
**Competency:**         **A2    Use WHMIS**

**Objectives**

To be competent in this area, the individual must be able to:

- Interpret Material Safety Data Sheets (MSDS).
- Apply knowledge of WHMIS regulations to maintain a safe working environment.

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. State the purpose of WHMIS</li> <br/> <li>2. Describe key elements of WHMIS</li> <br/> <li>3. Describe the responsibilities of suppliers under WHMIS</li> <br/> <li>4. Describe the responsibilities of employers under WHMIS</li> <br/> <li>5. Describe information to be disclosed on an MSDS</li> </ol> | <ul style="list-style-type: none"> <li>• Protection of workers from adverse effects of hazardous materials through provision of relevant information while minimizing economic impact on industry and disruption of trade</li> <li>• Recognition of rights <ul style="list-style-type: none"> <li>○ Workers</li> <li>○ Employers</li> <li>○ Suppliers</li> <li>○ Regulators</li> </ul> </li> <li>• MSDS labelling of containers of hazardous materials</li> <li>• Worker education programs</li> <li>• Provide <ul style="list-style-type: none"> <li>○ MSDSs</li> <li>○ Labels</li> </ul> </li> <li>• Provide <ul style="list-style-type: none"> <li>○ MSDSs</li> <li>○ Labels</li> </ul> </li> <li>• Ensure employee training</li> <li>• Hazardous ingredients</li> <li>• Preparation information</li> <li>• Product information</li> <li>• Physical data</li> <li>• Fire or explosion</li> <li>• Reactivity data</li> <li>• Toxicological properties</li> <li>• Preventive measures</li> <li>• First-aid measures</li> </ul> |
|--|---|

**LEARNING TASKS**

6. Identify symbols found on WHMIS labels and their meaning

**CONTENT**

- Compressed gases
- Flammable and combustible materials
- Oxidizing materials
- Poisonous and infectious materials
- Materials causing immediate and serious toxic effects
  - Materials causing other toxic effects
  - Bio-hazardous infectious materials
  - Corrosive materials
- Dangerously reactive materials

**Line (GAC):**            **A    USE SAFE WORK PRACTICES**  
**Competency:**         **A3    Practice fire prevention**

**Objectives**

To be competent in this area, the individual must be able to:

- Prevent and identify various classes of fires.
- Select appropriate fire extinguishers for the class of fire and environmental condition.

**LEARNING TASKS**

**CONTENT**

- |  |  |
|--|--|
| <p>1. Describe the conditions necessary to support a fire</p>                        | <ul style="list-style-type: none"> <li>• Oxygen</li> <li>• Fuel</li> <li>• Heat</li> </ul>   |
| <p>2. Identify various types of fires</p>  | <ul style="list-style-type: none"> <li>• Type A</li> <li>• Type B</li> <li>• Type C</li> <li>• Type D</li> </ul>   |
| <p>3. Explain principles of firefighting</p>   | <ul style="list-style-type: none"> <li>• Fire triangle</li> <li>• Flammable liquids</li> <li>• Loose material</li> <li>• Gas</li> <li>• Company specific firefighting procedures</li> <li>• National Fire Prevention Association (NFPA)</li> </ul> |
| <p>4. Describe the proper use of fire extinguishers</p>                              | <ul style="list-style-type: none"> <li>• Handling and usage</li> <li>• Pull, aim, squeeze, sweep (PASS)</li> <li>• Storage</li> <li>• Inspection (signed, dated, sealed)</li> <li>• Identification (colour, shape, lettering)</li> </ul>           |
| <p>5. Describe the considerations and steps to be taken prior to fighting a fire</p> | <ul style="list-style-type: none"> <li>• Warning others and notifying fire department</li> <li>• Evacuation of others</li> <li>• Fire contained and not spreading</li> <li>• Personal method of egress</li> <li>• Training</li> </ul>              |

**Line (GAC):**            **B**    **ORGANIZE WORK**  
**Competency:**        **B1**   **Explain the locksmith trade**

**Objectives**

To be competent in this area, the individual must be able to describe general duties and responsibilities of the Locksmith trade.

**LEARNING TASKS**

**CONTENT**

- |  |  |
|--|--|
| <p>1. Describe scope of the trade</p> <p>2. Demonstrate good work ethics</p> <p>3. Describe security clearance procedures</p> <p>4. Identify liability responsibilities</p> <p>5. Describe commercial vehicle requirements</p> <p>6. Inspect vehicle</p> | <ul style="list-style-type: none"> <li>• Principles of locksmithing</li> <li>• Specialty areas <ul style="list-style-type: none"> <li>○ Automotive</li> <li>○ Forensic or investigative</li> <li>○ High security</li> <li>○ Master keying</li> <li>○ Access control</li> <li>○ Safes and vaults</li> <li>○ Video surveillance (CCTV)</li> </ul> </li> <li>• Customer service</li> <li>• Interpersonal skills and attire</li> <li>• Professionalism</li> <li>• Basic accounting procedures</li> <li>• Basic business practices</li> <li>• Code and licencing requirements <ul style="list-style-type: none"> <li>○ Security Programs and Police Technology Division – Public Safety and Solicitor General</li> <li>○ Fingerprinting</li> <li>○ Criminal records check</li> </ul> </li> <li>• Proper installations <ul style="list-style-type: none"> <li>○ Manufacturer’s specifications</li> </ul> </li> <li>• Regulatory compliance</li> <li>• Insurance coverage</li> <li>• Professional upgrading to remain current</li> <li>• Trade’s Code of Conduct</li> <li>• Licencing</li> <li>• Costs</li> <li>• Regulation requirements</li> <li>• Physical condition</li> <li>• Operating condition</li> <li>• Regulation requirments</li> </ul> |
|--|--|

**Line (GAC):**                **B**    **ORGANIZE WORK**  
**Competency:**            **B2**   **Interpret blueprints**

**Objectives**

To be competent in this area, the individual must be able to:

- Interpret blueprints as they pertain to the Locksmith trade.
- Describe types of components that are available and explain their applications.

**LEARNING TASKS**

1. Interpret blueprints

2. Describe related mechanical components

**CONTENT**

- Types of drawings and schedules
- Read blueprints
- Read floor plans
- Take-offs
  - Design hardware schedule
  - Set up a key schedule
  - Route wires for access or electronic lock systems
- Engineering symbols and coding
  - Identify
  - Interpret
- Cross-referencing of hardware specifications to different manufacturers
- Types
  - Locks
  - Hinges
  - Door closers
  - Strikes
  - Panic devices
- Applications
- Functions

**LEARNING TASKS**

3. Describe related electrical and electronic components

**CONTENT**

- Types
  - Electric strikes
  - Locks and mag locks
  - Rectifiers
  - Keyless entry systems
  - Solenoids
  - Transformers
  - Power transfers
  - Relays
  - Time clocks, electronic security timers
  - Switches
  - Circuit breakers
  - Fuses
  - Remote controls
  - Electrified panic exit devices
  - Electronic keypads and card readers
- Applications
- Functions

**Line (GAC):**            **B**    **ORGANIZE WORK**  
**Competency:**        **B3**   **Apply codes and regulations**

**Objectives**

To be competent in this area, the individual must be able to describe and apply Acts, Regulations and Municipal By-laws affecting Locksmiths and their customers.

**LEARNING TASKS**

1. Describe Acts and Regulations related to the Locksmith trade
  
2. Apply building codes
  
3. Apply fire codes, ratings and labels

**CONTENT**

- Laws and regulations
- Permit requirements
- Resource locations
  
- Types
  - National Building Code of Canada
  - BC Building Code
- Scope pertaining to locksmithing
- Reading the code books
  - Definitions and abbreviations
- Permits
- Responsibility and liability
  
- Types of code
  - National Fire Code of Canada
  - BC Fire Code
  - NFPA 80 – Standards for Fire Doors and Fire Windows
  - NFPA 101 – Life Safety Code
- Scope pertaining to locksmithing
- Reading the code books
  - Definitions and abbreviations
- Determine product compatibility
- Responsibility and liability

**Line (GAC):**            **B    ORGANIZE WORK**  
**Competency:**        **B4    Perform material handling**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe stock handling, invoicing and shipping procedures.
- Follow and complete work orders and order the required parts to complete the project.

**LEARNING TASKS**

**CONTENT**

- |   |   |
|---|---|
| <p>1. Describe stock handling procedures</p>            | <ul style="list-style-type: none"> <li>• Product knowledge</li> <li>• Purchasing procedures <ul style="list-style-type: none"> <li>○ Order stock</li> <li>○ Proper forms</li> <li>○ Catalogues and supply lists</li> </ul> </li> <li>• Receiving procedures <ul style="list-style-type: none"> <li>○ Incoming order procedure</li> <li>○ Inspect stock</li> <li>○ Stores stock</li> </ul> </li> <li>• Warehousing procedures <ul style="list-style-type: none"> <li>○ Warehouse set-up for Locksmiths</li> </ul> </li> <li>• Set-up and stocking procedures for Locksmiths vans</li> <li>• Inventories</li> </ul> |

Complete work orders and order required parts</p> | <ul style="list-style-type: none"> <li>• Types of work orders</li> <li>• Parts of the work order</li> <li>• Completing a work order <ul style="list-style-type: none"> <li>○ Description of work required</li> <li>○ Importance of properly filling out the work order</li> </ul> </li> <li>• Order components and parts <ul style="list-style-type: none"> <li>○ Proper part numbers and nomenclature</li> <li>○ Getting a signature on the completed work order</li> </ul> </li> </ul>  |

**Line (GAC):**            **B**    **ORGANIZE WORK**  
**Competency:**        **B5**   **Perform customer sales and services**

**Objectives**

To be competent in this area, the individual must be able to:

- Demonstrate effective communication skills.
- Perform customer sales and service.

**LEARNING TASKS**

**CONTENT**

- |  |  |
|--|--|
| <p>1. Establish and maintain effective communication</p> | <ul style="list-style-type: none"> <li>• Industry vocabulary</li> <li>• Communication techniques <ul style="list-style-type: none"> <li>○ Oral</li> <li>○ Written</li> </ul> </li> <li>• Supervisors</li> <li>• Co-workers</li> <li>• Other tradespersons</li> <li>• Customers</li> <li>• Suppliers</li> <li>• Manufacturers</li> <li>• Regulatory officials</li> </ul>  |
| <p>2. Perform customer sales and services</p>            | <ul style="list-style-type: none"> <li>• Selling techniques <ul style="list-style-type: none"> <li>○ Personal characteristics</li> <li>○ Knowledge base</li> <li>○ Rudiments of selling services and products</li> <li>○ Professional ethics</li> </ul> </li> <li>• Identifying customer needs</li> <li>• Taking instructions</li> <li>• Giving instructions</li> <li>• Explaining system concepts <ul style="list-style-type: none"> <li>○ System operation</li> <li>○ User features</li> <li>○ General system maintenance</li> </ul> </li> </ul> |

### LEARNING TASKS

3. Maintain records specific to workplace requirements

### CONTENT

- Sales documents
  - Contracts
  - Estimates
  - Proposals
  - Commission reports
- Technical documents
  - Schematics
  - Wiring diagrams
  - Cable lists
  - Key records
  - Door schedules
- Administrative documents
  - Work orders
  - Time sheets
  - Maintenance records
- End user documents
  - Instruction manuals
  - Activity reports
  - Insurance reports

**Line (GAC):**            **B**    **ORGANIZE WORK**  
**Competency:**        **B6**   **Perform security consultation**

**Objectives**

To be competent in this area, the individual must be able to:

- Perform a client’s needs assessment and communicate, verbally and written, effectively to the client.
- Determine project compliance with codes.

**LEARNING TASKS**

1. Identify customer needs
  
2. Perform security surveys
  
3. Determine compliance with building and fire codes

**CONTENT**

- Overview of crime prevention
- Security concerns in relation to the Codes
- Identify security requirements
- Products available
  
- Break-and-enter concerns
- Employee safety concerns
- Traffic control for customers
- Written list of deficiencies for the owner
  
- Identify and interpret relevant codes
  - Life safety
    - Fire escape doors
    - Panic devices
    - Door hold-open devices
    - Magnetic locks
  - Minimum lock requirements as per current code
- Permits
- Job site issues
  - WorkSafeBC inspections
  - Union jurisdictions
  - Dealing with other contractors

**Line (GAC):**            **C    USE TOOLS AND EQUIPMENT**  
**Competency:**        **C1    Use hand tools**

**Objectives**

To be competent in this area, the individual must be able to:

- Select and use hand tools for particular applications.
- Maintain and properly store hand tools.

**LEARNING TASKS**

**CONTENT**

1. Describe basic hand tools

- Followers
- Tweezers
- Screwdrivers
- Pop riveter
- Picks
- Pick guns
- Jigs
- Hack saws
- Vises
- Clamps
- Hammers
- Chisels and punches
- Files
- Slip joint pliers
- Socket sets
- Wrenches
- Plug spinners
- Measuring and layout tools
- Taps and dies
- Locksmith specialty hand tools
- Car opening tools

2. Use hand tools

- Application
- Tool selection
- Maintenance
- Storage
- Safety

**Line (GAC):**            **C    USE TOOLS AND EQUIPMENT**  
**Competency:**        **C3    Use key-cutting equipment**

**Objectives**

To be competent in this area, the individual must be able to operate key-cutting equipment.

**LEARNING TASKS**

1. Describe key-cutting equipment

2. Use key-cutting machines

**CONTENT**

- Duplicating machines
  - Types
  - Mechanics of cutting keys
- Milling machines
  - Mechanics of the machine as it relates to key cutting
- Code machines
  - Types
  - Function
  - Clippers and punches
- Application
- Selection
- Maintenance
- Storage
- Safety

**Line (GAC):** C USE TOOLS AND EQUIPMENT  
**Competency:** C4 Describe welding

### Objectives

To be competent in this area, the individual must be able to describe basic welding equipment, characteristics, and techniques.

### LEARNING TASKS

1. Describe welding

### CONTENT

- Types of equipment
  - Oxyacetylene
  - Gas Metal Arc (GMAW)
  - MIG
  - TIG
- Welding characteristics
- Cutting components
- Basic techniques
- Safety

**Line (GAC):**            **D    CREATE KEYS**  
**Competency:**        **D1   Duplicate keys**

**Objectives**

To be competent in this area, the individual must be able to:

- Identify and describe keys.
- Demonstrate the ability to duplicate keys.

**LEARNING TASKS**

1. Describe keys and blanks

2. Operate key machine

**CONTENT**

- Types
  - Paracentric
  - Tubular
  - Bit and barrel
  - Flat steel
  - High security
- Manufacturers
- Parts of a key
  - Bow
  - Tip
  - Blade
  - Shoulder stop
  - Tip stop
- Composition of a key
  - Nickel/silver
  - Nickel plated
  - Brass
  - Steel
  - Aluminum alloy
  - Plastic
  - Thickness
  - Length
- Key catalogues and cross reference charts
  - Match key blanks to pictures and profiles
- Visual blank identifying/matching
- High security key
- Restricted distribution key
- Operation and function
- Types
  - Manual duplicator
  - Semi-automatic duplicator
  - Automatic duplicator
  - Code machine

**LEARNING TASKS**

3. Duplicate keys

**CONTENT**

- Milling
- Tubular
- Flat steel
- Bit and barrel
- Parts
  - Shoulder guide
  - Tip stop
  - Jaws
  - Cutters
  - Carriage
  - Dials
  - Cords
  - Adjustment points
- Cutting theory
  - Visual inspection
  - Angles of cut
  - Depth
  - Spacing
  - Maximum adjacent cut specifications
  - Width of slots or wards
  - High security
- Placing original and duplicate
- Machine operation
  - Feed
  - Adjustments for spacing and depth
  - Set-up a duplicator to cut multiple generation key
- Maintenance
  - Adjustments
  - Lubrication
  - Cleaning
- Safety
  - Keep machine and work area clean
  - Use goggles and safety equipment
  - Stay alert
  - Stay clear of cutter while machine is operating
  - Lockout procedure for machine maintenance
- Measure keys
- Cut keys using key machines
- Cut keys using hand tools
- Duplicate broken keys

**LEARNING TASKS**

**CONTENT**

**Line (GAC):**            **D**    **CREATE KEYS**  
**Competency:**        **D2**   **Originate keys**

- Troubleshooting poorly operating keys

**Objectives**

To be competent in this area, the individual must be able to:

- Describe methods of originating keys and their applications.
- Originate keys using the appropriate method.

**LEARNING TASKS**

**CONTENT**

1. Describe methods of originating keys

- By code
- By disassembly
- By decoding
- By pick and read
- By impressing
- By sight

2. Use codes to generate key

- Application of method
- Identify a key code
  - Code versus part number
- Read a code book
  - Transfer a code to actual biting
  - Spacing and depths
  - Key blank number
- Differentiate between code series in the same manufacturer's codes
- Differentiate the same code for different manufacturers

3. Dismantle and decode a lock to fit a key

- Application of method
- Disassembly of the cylinder
  - Picking
  - Shimmiing
  - Rapping
- Calipers or micrometer, to measure the length of each pin or wafer
- Depth keys to decode the lock
- Keys for a lever lock
- Determine a master key given a keyed cylinder and a change key
- Determine a change key given a keyed cylinder

**LEARNING TASKS**

- 4. Demonstrate pick and read to generate a key
  
- 5. Demonstrate impressioning a key

**CONTENT**

- and a master key
- How to compensate for wear
- Pick the control shear line of an interchangeable core cylinder
- Determine the control key of interchangeable core cylinders
- Picking techniques
  - Application of method
- Spacing
- Pick used to feel the depths and interpret into a key depth
- Dressing a key and finish off by impression
- Impressioning techniques
  - Application of method
- Use of visual aid or special lighting

- 4. Rekey locks
  - Characteristics of a good combination
  - Procedures for rekeying
    - Tool selection
    - Decoding the lock and/or decoding a key
    - Pin stacks
  - Check drivers and springs
  
- 5. Repair locks
  - Troubleshooting various locks
    - Remove broken keys
    - Key won't turn
    - Latch or deadbolt won't throw or retract
    - Parts loose
    - Intermittent malfunctions
    - Repair or replace
  - Parts breakdown diagrams
  - Type and purposes of lubricants
  - Parts replacement
  
- 6. Service locks
  - Clean and lubricate
  - Tighten screws and components
  - Check for wear
  - Check for key functionality
  - Alignment and proper operation
  - Check drivers and springs

**Line (GAC):**                **E**    **INSTALL AND SERVICE LOCKS**  
**Competency:**            **E3**   **Install and service high security hardware**

**Objectives**

To be competent in this area, the individual must be able to describe, service and install high security locks.

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. Describe high security locks and restricted keyways</li> <br/> <li>2. Service high security locks</li> <br/> <li>3. Install high security locks</li> </ol> | <ul style="list-style-type: none"> <li>• Types</li> <li>• Functions</li> <li>• Specifications</li> <br/> <li>• Cut keys</li> <li>• Repair</li> <li>• Master key</li> <li>• Disassemble for servicing</li> <li>• Types of lubricants and frequency of use</li> <li>• Troubleshooting</li> <br/> <li>• Lock selection</li> <li>• Installation and hardware requirements</li> <li>• Tool selection and application</li> <li>• Manufacturer’s specifications</li> <li>• Installation procedures</li> <li>• Clean-up</li> <li>• Explain operation to client</li> </ul> |
|--|---|

**LEARNING TASKS**

5. Describe locks for motorcycles, marine craft and recreational vehicles

**CONTENT**

- Anti-theft device
- Lock types
  - Utility
  - Chassis
  - Ignition
- Applications
- Operation
- Key codes and keying procedures
- Resource material available

- 4. Perform safe and vault entry
  - Safe and vault hardware
  - Vault specifics
    - Alarm systems
    - Design and construction requirements
    - Ventilation equipment
  - Safe and vault penetration
    - Entry methods
    - Tools and equipment
  - Barrier materials
  
- 5. Opens, installs and maintains safe deposit boxes
  - Parts of a safe deposit box
  - Policy regarding opening
  - Type and size of door, lock and prep key
  - Methods of opening
    - Drilling boxes
    - Replacing locks
  - Install lock on door of box
    - Adjust
    - Fit door and box
  - Maintenance
  - Troubleshoot

**Line (GAC):** F **INSTALL HARDWARE**  
**Competency:** F1 **Repair doors and frames**

**Objectives**

To be competent in this area, the individual must be able to:

- Inspect original door features and operations for both steel and wood doors.
- Repair or replace metal and wood doors.
- Describe methods of repairing or replacing metal or wood frames.

**LEARNING TASKS**

**CONTENT**

- |   |   |
|---|---|
| <p>1. Repair or replace steel doors</p>             | <ul style="list-style-type: none"> <li>• Inspect original features and specifications               <ul style="list-style-type: none"> <li>○ Labelling</li> <li>○ Handing</li> <li>○ Hinge location</li> <li>○ Height, width and thickness</li> <li>○ Hinge preps</li> <li>○ Hardware prep and measurement</li> <li>○ Vents or windows</li> </ul> </li> <li>• Order new door to specifications</li> <li>• Replace door and reinstall all hardware</li> <li>• Test operation</li> </ul>                            |

**Line (GAC):**            **F**    **INSTALL HARDWARE**  
**Competency:**        **F2**    **Install door closers**

**Objectives**

To be competent in this area, the individual must be able to describe, install and troubleshoot door closers.

**LEARNING TASKS**

1. Describe styles of closers
  
2. Install door closers

**CONTENT**

- Styles
- Types of installations
- Manufacturers
- Operation and adjustments
- Special hardware
  
- Wood or metal door frame assembly
- Closer selection
- Arm configuration
- Placement
- Adjustments
- Hold-open features
- Troubleshooting

**Line (GAC):**            **F**    **INSTALL HARDWARE**  
**Competency:**        **F3**    **Install panic hardware**

**Objectives**

To be competent in this area, the individual must be able to describe, install and repair panic exit devices and hardware.

**LEARNING TASKS**

1. Describe panic exit devices and hardware
  
2. Install and repair panic devices and hardware

**CONTENT**

- Styles
- Functions
- Manufacturers
  
- Selection
- Installation methods
- Tool selection
- Test for proper operation
- Troubleshooting

**Line (GAC):**            **F**    **INSTALL HARDWARE**  
**Competency:**        **F4**    **Service other hardware**

**Objectives**

To be competent in this area, the individual must be able to repair and service other hardware associated with locksmithing.

**LEARNING TASKS**

1. Repair and service other hardware

**CONTENT**

- Home and office furniture
- Detention (jail locks)
- Door operators
- Glass and aluminum doors and frames
- Components

**Line (GAC):            G    INSTALL ELECTRICAL AND ELECTRONIC COMPONENTS AND HARDWARE**

**Competency:            G1    Apply electrical and electronic theory**

**Objectives**

To be competent in this area, the individual must be able to:

- Explain basic electrical theory as it pertains to the Locksmith trade.
- Connect common electrical and electronic components.
- Troubleshoot and solve common electrical faults.

**LEARNING TASKS**

**CONTENT**

- |  |  |
|--|--|
| 1. Describe basic electrical theory      | <ul style="list-style-type: none"> <li>• Principles</li> <li>• Terms</li> <li>• Voltage</li> <li>• Current</li> <li>• Resistance</li> <li>• Conductors</li> <li>• Transformer action</li> <li>• Solenoid action</li> <li>• Power sources</li> <li>• Ohm's law</li> <li>• Kirchhoff's law</li> </ul>            |
| 2. Solve simple circuit problems         | <ul style="list-style-type: none"> <li>• Apply Ohm's Law</li> <li>• Apply Watt's Law</li> <li>• Troubleshoot component problems</li> <li>• Solve series circuits problems</li> <li>• Solve parallel circuits</li> <li>• Solve combination circuits</li> <li>• Electrical meters and measuring tools</li> </ul> |
| 3. Connect circuit components            | <ul style="list-style-type: none"> <li>• Resistors</li> <li>• Switches</li> <li>• Fuses</li> <li>• Capacitors</li> <li>• Diodes</li> <li>• Relays</li> <li>• Timers</li> <li>• Transformers</li> </ul>   |
| 4. Describe power supplies and batteries | <ul style="list-style-type: none"> <li>• AC and DC power sources</li> <li>• Cells and batteries</li> <li>• Charging systems</li> </ul>   |

**Line (GAC):            G    INSTALL ELECTRICAL AND ELECTRONIC COMPONENTS AND HARDWARE**

**Competency:            G3    Repair and install electrical and electronic hardware**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe different makes of electric strikes and models available for different applications.
- Diagnose, repair and install electrical hardware systems.

**LEARNING TASKS**

1. Describe electric and electronic locks and strikes
  
2. Install electrical hardware

**CONTENT**

- Makes/manufacturers
- Types/models
- Features
- Functions
  
- Install in metal, wood or other building materials
  - Marking, using templates, cutting and drilling
- Hardware
  - Electric strikes
  - Latches
  - Electro-magnetic
  - Video surveillance equipment (CCTV)
- Tool selection
- Codes, blueprints and as-built drawings
- Voltage and current draws
- Alignment and adjustment

**LEARNING TASKS**

3. Wire the installation

4. Diagnose and repair electrical components and hardware

**CONTENT**

- Gauge and wire selection
- Run wire
  - Carpet runs
  - False ceilings
  - Concealed behind walls
  - Magnetic switches
  - Door cords
  - Electric hinges
- CEC and BC Electrical code
  - Classes of circuits
  - Parallel and series circuit hook-up
  - Overcurrent protection use
- Connect wires
  - Solder
  - Wire connectors
  - Terminal blocks
  - Crimp caps
- Numbering and lettering procedures for wires
- Hook-up each component in a system according to the circuit diagram
- Troubleshoot
  - Diagnose
  - Follow codes and drawings
- Repair
  - Electrical components
  - Electrical hardware
  - Electrical system

**Line (GAC):**                    **G     INSTALL ELECTRICAL AND ELECTRONIC COMPONENTS AND HARDWARE**

**Competency:**                **G4    Test and commission electrical and electronic installations**

**Objectives**

To be competent in this area, the individual must be able to:

- Test, troubleshoot and verify that the system works.
- Commission system and client orientation.

**LEARNING TASKS**

1. Test complete system
  
2. Commission system

**CONTENT**

- Verify system works
- Use troubleshooting techniques
  
- Start-up
- System sign-over to client

**Line (GAC):**                **H    DEVELOP MASTER KEY SYSTEMS**  
**Competency:**            **H1   Plan master key systems**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe master key systems.
- Perform client consultation and plan master key systems.

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| <p>1. Describe master key systems</p>                              | <ul style="list-style-type: none"> <li>• Basic principles and terminology</li> <li>• Types of systems</li> <li>• Master keying               <ul style="list-style-type: none"> <li>○ Planning</li> <li>○ Charting</li> <li>○ Process</li> <li>○ Total progression structure</li> <li>○ Manual and computer generated</li> </ul> </li> <li>• Decode existing system</li> <li>• Manufacturer's specifications</li> </ul> |
| <p>2. Determine client requirements and plan master key system</p> | <ul style="list-style-type: none"> <li>• Conduct physical survey as per Competency B5</li> <li>• Organization of information</li> <li>• Draw schematic of the system</li> <li>• Review schematic with client</li> <li>• Product and system knowledge</li> <li>• Customer approvals</li> <li>• Future needs/expansion</li> </ul>   |

**Line (GAC):**            **H    DEVELOP MASTER KEY SYSTEMS**  
**Competency:**         **H2    Generate bitting list and pinning charts**

**Objectives**

To be competent in this area, the individual must be able to:

- Organize and coordinate a master key project.
- Generate key bitting lists and pinning charts.

**LEARNING TASKS**

**CONTENT**

- |   |  |
|---|--|
| <ol style="list-style-type: none"> <li>1. Select new master key</li> <br/> <li>2. Factoring the system</li> <br/> <li>3. Generate codes, masters and sub-masters as needed</li> <br/> <li>4. Generate pinning charts for each code</li> </ol> | <ul style="list-style-type: none"> <li>• Manufacturer specific rules for selecting master keys</li> <li>• Maximum adjacent cut (MAC'S)</li> <li>• Parity (odd and even)</li> <br/> <li>• Constant pin lengths</li> <li>• Progression sequence</li> <li>• Step increment</li> <li>• Room for future expansion</li> <br/> <li>• Progression</li> <li>• Matrix</li> <li>• Tree</li> <li>• Manual and computer generated</li> <br/> <li>• Manual and computer generated <ul style="list-style-type: none"> <li>○ Bitting numbers</li> <li>○ Generating charts</li> </ul> </li> </ul> |
|---|--|

**Line (GAC):** H **DEVELOP MASTER KEY SYSTEMS**  
**Competency:** H3 **Master key cylinders**

**Objectives**

To be competent in this area, the individual must be able to apply master key system to the facility.

**LEARNING TASKS**

1. Apply master key system to the facility

**CONTENT**

- Manufacturer’s specifications and processes
- Methods and techniques
- Install or recode cylinders corresponding to the master key system
- Test all keys and entire lock function
- Troubleshooting
